Solid Waste Management Units 2, 5, 7, and 18 Inland Area, Naval Weapons Station Seal Beach Detachment Concord

Concord, California ***October 2008***

Fact Sheet

Navy Invites Public Comment on Proposed Plan for SWMUs 2, 5, 7, and 18

The Department of the Navy (Navy) encourages the public to comment on the attached Proposed Plan for cleanup of Solid Waste Management Units 2, 5, 7, and 18 (known as the SWMUs site) in the Inland Area at Naval Weapons Station Seal Beach Detachment Concord (NAVWPNSTA Seal Beach Det Concord), in Concord, California. The SWMUs site was used by the Navy as an industrial complex that included locomotive steam cleaning and maintenance, a paint shop, and a fire station.

The Navy is proposing to remediate solvents in groundwater at the site. Solvent concentrations in groundwater will be reduced by treating affected groundwater and removing contaminants from soil vapors.

The public comment period is from October 7 through November 6, 2008. Public comments can be submitted by mail, fax, or e-mail throughout the comment period. The public meeting will be held on October 22, 2008, at the Concord Senior Center from 6:30 to 8:30 p.m. Members of the public may also submit written and oral comments at the public meeting. The Navy will consider and respond to the public comments during preparation of the Record of Decision for the SWMUs site.

Please see the Proposed Plan for more details. The Proposed Plan is available for review at the Concord Public Library and online at www.bracpmo.navy.mil
