MEMORANDUM

Former Marine Corps Air Station El Toro  
Irvine, California 92618

February 05, 2010

SUBJ: ACTION MEMORANDUM FOR REMOVAL ACTION AT FORMER MARINE  
CORPS AIR STATION EL TORO, INSTALLATION RESTORATION  
PROGRAM SITE 1, ADJACENT PROPERTY, IRVINE, CALIFORNIA

Site Status: National Priorities List (NPL)

Category of Removal: Time-Critical Removal Action (TCRA)

CERCLIS ID: CA6170023208

Site ID: IRP Site 1, Adjacent Property

This Page Intentionally Left Blank

## 1. PURPOSE

The purpose of this Action Memorandum is to document, for the Administrative Record, the Department of the Navy's (DON's) decision to undertake a Time Critical Removal Action (TCRA) to address potential explosives safety hazards presented by potential munitions and explosives of concern (MEC) on property located adjacent to Installation Restoration Program (IRP) Site 1 at former Marine Corps Air Station (MCAS) El Toro, California, hereinafter known as the Adjacent Property. The potential MEC items on the Adjacent Property are a result of historical past explosive ordnance disposal (EOD) training activities that were conducted within IRP Site 1. The Adjacent Property is owned by The Irvine Company (TIC) and Orange County Flood Control District (OCFCD).

The Department of Defense (DoD) has the authority to undertake Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) response actions, including removal actions, under 42 United States Code (U.S.C.) Section (§) 9604, 10 U.S.C. § 2705, and federal Executive Order 12580 as amended.

This TCRA will include a comprehensive assessment to document the presence and distribution of munitions, and based on this assessment, all munitions that are identified and present an explosive hazard will be removed. The selected removal action will substantially reduce the identified pathways of exposure to hazardous substances for future users of this area. This TCRA is anticipated to be the final response action to address explosives safety hazards presented by MEC on the Adjacent Property. However, a feasibility study (FS) may be conducted at a later date to evaluate potential alternatives for a final response action, if required/necessary based on the results of the comprehensive assessment and the TCRA.

The TCRA for the Adjacent Property is deemed consistent with the factors set forth within the National Oil and Hazardous Substance Pollution Contingency Plan (NCP) 40 Code of Federal Regulations (CFR) Part (pt.) 300, based on the findings of: 300.415(b)(2)(i) and (iv) of NCP. These findings are discussed in more detail in Section 3.

There are not any nationally significant or precedent-setting issues for e Adjacent Property.

## 2. SITE CONDITIONS AND BACKGROUND

This Section presents the description, location, and background for the Adjacent Property, as well as the physical characteristics and past munitions releases from IRP Site 1. This Section also addresses the regulatory status and current/previous actions that have occurred at the Adjacent Property.

### 2.1 SITE DESCRIPTION

The Adjacent Property is located in the foothills of the Santa Ana Mountains (Figure A-1). The Adjacent Property includes open space immediately west of IRP Site 1, located in the northeast portion of former MCAS El Toro. IRP Site 1 was used for EOD training from 1952 until closure of former MCAS El Toro on 2 July 1999 (BNI 1995). IRP Site 1 includes the 16.9-acre Northern EOD Training Range, the 16.6-acre Southern EOD Training Range, and a 40.2-acre buffer zone, for a total of approximately 73.7 acres in size (Bechtel National, Inc. [BNI] 1995) (Figure A-2). The majority of EOD training took place at the Northern EOD Training Range.

#### 2.1.1 Removal Site Evaluation

Previous investigations pertaining to munitions at IRP Site 1 provide an evaluation background for the proposed TCRA area and are summarized in the following text. The detailed procedures and results of these investigations are presented in the Final Phase II Remedial Investigation (RI) Report (Earth Tech 2006) and the TCRA Work Plan (AECOM Technical Services, Inc. [ATS] 2009).

The investigations summarized below satisfy the substantive requirements of the removal site evaluation stipulated in 40 C.F.R. Section 300.410, including removal preliminary assessment and a removal site inspection. These investigations included site inspections, and collection and review of data to identify the source and the nature of munitions on the Adjacent Property. In addition, the documentation of previous investigations presents qualitative evaluation of explosive safety hazards/threats, and factors necessary to make a determination of whether a removal action is necessary.

#### *2.1.1.1 RANGE IDENTIFICATION AND PRELIMINARY RANGE ASSESSMENT*

The Range Identification and Preliminary Range Assessment was conducted to provide a historical baseline for former MCAS El Toro's active and inactive Ranges (United States Army Corps of Engineers [USACE] 1998). This study compiled information from existing sources and did not include sampling of the Ranges. A list of the types of munitions and their estimated quantities employed to destroy unserviceable items was presented; these items primarily included various types of bulk explosives and blasting caps, and incendiary hand grenades. Unexploded ordnance (UXO) was estimated at less than 1 per acre. The possibility of "kick-outs," or live munitions that were not destroyed during operations, was "considered to be unlikely due to the tilling of the Ranges' grounds twice a year." The maximum depth of munitions was estimated at approximately 18 inches or less, which is the approximate depth of tilling at IRP Site 1.

#### *2.1.1.2 RANGE EVALUATION FOR MEC*

The 2002 MEC Range Evaluation (Earth Tech 2006) identified the following four MEC items in the Northern EOD Training Range: one 2-inch section of flex-linear shaped charge; two 40-mm cartridge primers; and 1/4-pound (lb) smokeless powder. No MEC items were encountered in the Southern EOD Training Range, the Buffer Zone, or in the Range Perimeter during the evaluation. The range evaluation resulted in the recovery of 776 munitions debris (MD) items (totaling approximately 5,000 pounds) (Earth Tech 2006). The predominant MD item recovered was the 20 millimeter (mm) projectile. Results indicated MD; however, no MEC items were found on property adjacent to the western portion of IRP Site 1.

#### *2.1.1.3 2008 MUNITIONS CHARACTERIZATION ACTIVITIES*

In September 2008, munitions characterization activities were conducted on approximately 12.6 acres within the Range Perimeter portion of IRP Site 1, and on approximately 43 acres of the Adjacent Property (Figure A-3). In addition, this characterization evaluated the potential presence of munitions in 104 soil-filled ammunition cans stacked within IRP Site 1, and classified the munitions in a 55-gallon drum within IRP Site 1 containing suspected MEC items. As noted above, the 2008 munitions characterization satisfies the substantive requirements of the removal site evaluation stipulated in 40 C.F.R. Section 300.410.

This investigation identified 25 MEC items from 21 locations as well as additional MD items on the Adjacent Property up to 1,100 feet from the IRP Site 1 fence line. The predominant MEC item recovered was the 20 mm projectile. The MEC and MD items found on the Adjacent Property are likely kick-outs from EOD training activities conducted within IRP Site 1.

Therefore, given the potential for exposure of receptors on the Adjacent Property to explosive safety hazards presented by material potentially presenting an explosive hazard (MPPEH), a removal action that either eliminates or minimizes the hazard is appropriate on the Adjacent Property.

### 2.1.2 Physical Location

The Adjacent Property is located in a suburban, former agricultural area of southern California, within the city of Irvine, approximately 40 miles southeast of Los Angeles and approximately 100 miles north of San Diego (Figure A-1). The Adjacent Property may be divided into three main areas (see Figure A-4). One area immediately adjacent to IRP Site 1 is a primarily steeply-sloping hillside that slopes westward away from the western boundary of IRP Site 1, downhill towards Agua Chinon Wash and the Agua Chinon Retarding Basin. A second area consists of the northernmost portion of the Agua Chinon Retarding Basin, which is part of Agua Chinon Wash. This area is relatively flat. A third area is a moderately-sloping hillside leading from Agua Chinon Wash and the Agua Chinon Retarding Basin uphill towards Portola Parkway.

The climate in the area of the Adjacent Property is classified as Mediterranean, which is characterized by cool moist winters and warm dry summers. The average annual precipitation in the area is approximately 12.2 inches. The precipitation occurs mostly in the months from November through April.

The Adjacent Property contains or is located near vulnerable or sensitive populations, habitats, and/or natural resources. During the generalized biological survey conducted within IRP Site 1 in December 2000, four coastal California gnatcatchers (*Polioptila californica*), which are a Federally-listed threatened species, were documented. Three individual cactus wren (*Campylorhynchus brunneicapillus*) were also documented in a cactus patch within the coastal sage scrub (CSS) in the northwestern quadrant of IRP Site 1. This bird is a Federal regionally sensitive species. One non-vocalizing grasshopper sparrow (*Ammodramus savannarum*) was documented in non-native grassland in the north-central portion of the IRP Site 1. Two southern California rufous-crowned sparrows (*Aimophila ruficeps canescens*) were documented in the CSS located in the north-central portion of the IRP Site 1 (Federal regionally sensitive). The dominant vegetation types at IRP Site 1 consist of non-native grassland, CSS, and toyon-sumac chaparral. CSS is considered a sensitive vegetation type by several resource agencies because it supports a number of State- and Federally-listed endangered, threatened, and rare vascular plants as well as several bird and reptile species that are Federally-listed or are candidate species for Federal listing. The October 2007 Santiago Canyon wild fire burned a significant portion of the vegetation at IRP Site 1, Adjacent Property, including CSS.

### 2.1.3 Site Characteristics

The portion of the Adjacent Property that is immediately adjacent to IRP Site 1 is owned by TIC and is currently and planned to be open space. Agua Chinon Wash, including the Agua Chinon Retarding Basin, is owned by OCFCD and is used for flood control. The property to the west of Agua Chinon Wash is also open space owned by TIC but zoned for medium-density residential housing.

The majority of EOD training at IRP Site 1 took place at the Northern EOD Training Range. The Southern EOD Training Range was used for EOD training by the Orange County Sheriff's Department and Federal agencies (BNI 1995). When the former Station was operational, the Federal Bureau of Investigation (FBI) periodically used IRP Site 1 for training purposes (FBI 2000). The FBI's activities at IRP Site 1 included bomb technician training, post-blast investigation training, and emergency response operations, all of which involved the use of explosive devices and products.

This TCRA on the Adjacent Property will characterize and remove explosives safety hazards resulting from historical activities at IRP Site 1.

#### **2.1.4 Release or Threatened Release into the Environment of a Hazardous Substance or Pollutant or Contaminant**

As discussed in Section 2.1.1, MEC and MPPEH items have been recovered within IRP Site 1 and on property adjacent and to the west of IRP Site 1. A total of 25 MEC items were collected from the adjacent property. These MEC items predominantly included 20 mm projectiles that are likely kick-outs from EOD training activities conducted within IRP Site 1. There is a potential for initially buried MEC/MPPEH items to be exposed due to soil erosion. Additionally, there is a potential for items that were initially deposited on the surface to have rolled down the hillside into the gullies leading from IRP Site 1.

The primary exposure pathway by which the potential receptors may come in contact with the MEC/MPPEH within the TCRA area includes accidental human contact which could lead to fire or explosion.

Therefore, given the potential of exposing receptors to explosive safety hazards presented by MEC/MPPEH, a response action that either eliminates or minimizes this hazard is required at the Adjacent Property.

#### **2.1.5 National Priorities List Status**

Former MCAS El Toro was placed on the National Priorities List (NPL) of Superfund Program sites on 15 February 1990. Various studies and investigations have been completed or are in progress for remediation of sites at former MCAS El Toro. The remedial action evaluation process for the MEC-impacted soil at IRP Site 1 started in 2002 with the MEC Range Evaluation (Earth Tech 2006) and is currently in progress. A final Record of Decision (ROD) documenting the selected remedial action for soil at IRP Site 1 is anticipated to be signed in Fall 2011.

#### **2.1.6 Maps, Pictures and Other Graphical Representations**

The following figures are presented in Appendix A of this report:

- Figure A-1: Project Location Map
- Figure A-2: Site Plan
- Figure A-3: Areas of 2008 Additional Munitions Characterization
- Figure A-4: Time-Critical Removal Action Area
- Figure A-5: Project Schedule

The following tables are presented in Appendix B of this report:

- Table B-1: Federal Chemical-Specific ARARs by Medium
- Table B-2: Federal Location-Specific ARARs
- Table B-3: Federal Action-Specific ARARs
- Table B-4: State Chemical-Specific ARARs
- Table B-5: State Action-Specific ARARs
- Table B-6: Estimated Costs for Selected TCRA

## **2.2 OTHER ACTIONS TO DATE**

### **2.2.1 Previous Actions**

In addition to munitions-related investigations, various environmental investigations have been conducted at IRP Site 1 as a part of the CERCLA process to characterize the physical attributes of IRP Site 1 including the geology and hydrogeology, the nature and extent of chemical releases, the risks to human-health and the environment, and the feasibility of potential remediation technologies. Primary assessments performed at IRP Site 1 include the following:

- Phase I RI (Jacobs Engineering Group, Inc. [JEG] 1993) – Initial assessment of the nature and extent of chemical contamination at IRP Site 1,
- Stationwide Perchlorate Evaluation (BNI 1999) – Investigation of the extent of Stationwide perchlorate concentrations, including IRP Site 1 groundwater,
- Verification of Perchlorate at IRP Site 1 (Earth Tech 2001b) – Investigation to verify the presence of perchlorate at IRP Site 1,
- Historical Radiological Assessment (Weston 2000) – Assessment of potential, likely, or known sources of radioactive material and radioactive contamination at former MCAS El Toro, including IRP Site 1,
- Radiological Scan Surveys and Soil Sampling (Weston 2006) – Conducted to evaluate whether radium-226 was released at IRP Site 1,
- Phase II RI (Earth Tech 2006) – Characterization of the physical attributes of IRP Site 1, evaluation of the nature and extent of contamination, and assessment of risk to human-health and the environment, and
- Aquifer Characterization and Bench-Scale Treatability Testing (Enviro Compliance Solutions, Inc. [ECS] 2006) – Investigation of hydrologic characteristics of IRP Site 1 and feasibility evaluation of perchlorate treatment in groundwater.

A summary of the methodologies and results of these investigations is presented in the Phase II RI (Earth Tech 2006) and Aquifer Characterization and Bench-Scale Treatability Testing (ECS 2006) reports.

### **2.2.2 Current Actions**

Currently, the CERCLA remedial action evaluation process is ongoing for soil and groundwater at IRP Site 1. A Final Phase II RI report was issued in December 2006 and received concurrence from regulatory agencies. A Draft Feasibility Study (FS) Report was issued in January 2008 that presented the development and evaluation of remedial alternatives to address risks to human-health and the environment due to perchlorate-impacted groundwater, MEC-impacted soil, and naphthalene-impacted soil. Subsequently, the soil FS was separated from the groundwater FS and a Draft Final FS Report for vadose zone soil was issued in August 2008. Groundwater pilot testing is currently underway in support of the groundwater FS. Munitions characterization and TCRA findings will be incorporated into the Final FS Report for vadose zone soil.

## **2.3 REGULATORY AUTHORITIES ROLES**

This Section discusses the roles of regulatory agencies with potential involvement in the removal action for the Adjacent Property. Former MCAS El Toro is on the NPL list; therefore, the United States Environmental Protection Agency, Region 9 (U.S. EPA) is the lead federal regulatory agency for IRP Site 1. The lead regulatory oversight agency for the state is the California-EPA Department

of Toxic Substances Control (DTSC). Additionally, the California Regional Water Quality Control Board, Santa Ana Region (RWQCB) plays an active role in decision making for various sites at former MCAS El Toro.

### **2.3.1 Regulatory Agency Actions to Date**

The U.S. EPA, DTSC, and RWQCB Santa Ana Region have provided technical advice, oversight, and assistance during various CERCLA investigations at IRP Site 1, including the Phase I and II RIs, FS preparation, and munitions characterization. The regulatory agencies have concurred with the findings presented in the Phase II RI report, and have reviewed the Draft FS Report and the Draft Final FS Report for vadose zone soil. The regulatory agency representatives have and will continue to actively participate in regularly scheduled meetings regarding IRP Site 1.

#### *2.3.1.1 COORDINATION PERTAINING TO RCRA POST-CLOSURE REQUIREMENTS*

The DTSC maintains that the DON operated an open burn/open detonation (OB/OD) facility within the IRP Site 1 investigation area, and therefore, DTSC maintains that Resource Conservation Recovery Act (RCRA) closure and post-closure requirements apply to the OB/OD unit. The DON used munitions at the EOD Training Range for their intended purpose, including the training of military personnel, and explosives and therefore, emergency response specialists, and such training is neither waste treatment nor disposal. Therefore, the DON maintains that activities conducted at the former EOD Training Range were not regulated under RCRA.

Both DON's and DTSC's positions have been documented in the CERCLA documentation for IRP Site 1 including the Phase II RI Work Plan, the Phase II RI, and the Draft Final FS for the vadose zone. To facilitate resolution of the differing positions, the DON indicated that it would incorporate the substantive provisions of the State's RCRA closure and post-closure requirements into the CERCLA related documentation for IRP Site 1. More details on this issue are presented in the discussion of Applicable or Relevant and Appropriate Requirements (ARARs) (Section 4.1.4).

### **2.3.2 Potential for Continued Regulatory Agency Response**

The U.S. EPA, DTSC, and the RWQCB will provide technical advice and oversight and assistance during this TCRA and will continue to do so throughout the IRP process. It is expected that the DON's Defense Environmental Restoration Account funds will continue to be the exclusive source of funding for this program.

## **3. THREATS TO PUBLIC HEALTH OR WELFARE OR THE ENVIRONMENT, AND STATUTORY AND REGULATORY AUTHORITIES**

In accordance with the 1990 NCP, the following threats must be considered in determining the appropriateness of a removal action (40 CFR § 300.415(b)(2)):

- Actual or potential exposure to hazardous substances or pollutants or contaminants by nearby populations, animals, or food chains;
- Actual or potential contamination of drinking water supplies or sensitive ecosystems;
- Hazardous substances or pollutants or contaminants in drums, barrels, tanks, or other bulk storage containers, that may pose a threat of release;
- High levels of hazardous substances or pollutants or contaminants in soils largely at or near the surface that may migrate;

- Weather conditions that may cause hazardous substances or contaminants to migrate or be released;
- Threat of fire or explosion;
- The availability of other appropriate federal or state response mechanisms to respond to the release; and
- Other situations or factors that may pose threats to public health or welfare or the environment.

### **3.1 THREATS TO PUBLIC HEALTH OR WELFARE**

Three of the above threats apply to conditions on the Adjacent Property. The following subsections summarize these threats. Given the potential for exposure of humans to MEC/MPPEH items at the Adjacent Property; a response action that fully assesses the presence and distribution of munitions, and either eliminates or minimizes the explosive safety hazard is required.

#### **3.1.1 Actual or Potential Exposure to Hazardous Substances or Pollutants or Contaminants by Nearby Populations, Animals, or Food Chains**

MEC/MPPEH items potentially present within the Adjacent Property could be contacted by persons legally or illegally traversing the area. The mishandling of MEC items could lead to unintentional detonation which could result in exposure of individual causing the detonation and/or additional nearby human receptors to overpressure and/or fragmentation hazards from the detonation of MEC. Therefore, MEC/MPPEH items may present explosive safety risk to nearby populations.

#### **3.1.2 Threat of Fire or Explosion**

Accidental human contact of the MEC potentially present within the Adjacent Property could cause the MEC to detonate, causing a fire or explosion

#### **3.1.3 Weather Conditions That May Cause Hazardous Substances or Contaminants to Migrate or be Released**

Erosion could cause some MEC/MPPEH items that were initially deposited as kick-outs to roll down the hillside into the gullies on the Adjacent Property. This erosion could potentially cause the items to be more accessible for human contact if in Agua Chinon Wash, potentially increasing explosive safety risk, and a potential for fire or explosion.

### **3.2 THREATS TO THE ENVIRONMENT**

The potential MEC poses a threat to the environment because accidental human contact could lead to explosion.

## **4. SELECTED ACTION AND ESTIMATED COSTS**

### **4.1 SELECTED ACTION**

This section describes the selected removal alternative for this TCRA, as well as other alternative technologies that were evaluated but not selected. A discussion of ARARs is included in Section 4.1.4, and the proposed project schedule is included in Section 4.1.5.

#### 4.1.1 Selected Action Description

The TCRA is proposed to provide a complete evaluation to document the nature and distribution of munitions within the Adjacent Property, and to remove identified munitions that pose a threat to human health and the environment. Based on results of the 2008 munitions characterization, the TCRA area was subdivided into three areas based on the relative probability of encountering MEC as shown on Figure A-4. A relatively high probability area, designated as Area A, consists of the hillside west of IRP Site 1. Two relatively low probability areas include the following:

- Area B, designated as the area along the eastern boundary of the Agua Chinon Retarding Basin along the base of the Area A hillside, and areas northeast of the Agua Chinon Retarding Basin. The Basin itself is not included in the TCRA areas because it was constructed in 1998 at approximately the same time as the cessation of operations at the EOD Training Range (1999). Construction included moving a significant amount of the soil within the Basin. No munitions items have been reported during the construction or maintenance activities of the Basin since its construction; it is therefore unlikely that any items are present at this location.
- Area C, designated as the area west of Agua Chinon Wash. This area is included in this TCRA because one item considered to be MD was identified during the 2008 munitions characterization activities. Although this one item was not MEC, additional characterization in this area will be conducted to assess the presence of MEC. The area to the north of Highway 241 is not included in this TCRA because the Highway was constructed during the mid-1990's and no munitions-related items have been reported during or since its construction.

A detailed description of the proposed TCRA activities is included in the TCRA Work Plan (ATS 2009). A brief description is as follows:

- Surveying activities,
- Surface clearance of any metallic objects,
- Vegetation trimming,
- Digital geophysical mapping (DGM) followed by data analysis,
- Detector-aided visual investigation,
- Characterization of anomaly sources,
- Demilitarization of Material Documented as an Explosive Hazard (MDEH) and MEC items by explosive means, and
- Demilitarization of MDAS

#### 4.1.2 Contribution to Remedial Performance

The planned TCRA is expected to achieve a comprehensive removal and demilitarization of MEC/MPPEH items within the designated Areas A, B, and C on the Adjacent Property. Therefore, the Adjacent Property will be suitable for unrestricted reuse and no land use controls due to munitions safety reasons will be necessary. At the completion of this TCRA, no further munitions response actions are anticipated to be required on the Adjacent Property.

#### 4.1.3 Description of Alternative Technologies

The following two removal action alternatives were evaluated as part of the preparation of this TCRA Action Memorandum:

- Alternative 1 – No Action
- Alternative 2 – Munitions Removal, On-Site Demilitarization of MEC, and Off-Site Recycling of Material Documented as Safe (MDAS)

Each alternative was evaluated in terms of effectiveness, implementability, and cost. The two removal action alternatives are described below.

##### **Alternative 1 – No Action**

This alternative, No Action, was included to provide a basis for assessing the other alternatives. Under this alternative, none of the general response actions, including institutional controls (ICs)/access restrictions or MEC removal, would be implemented at IRP Site 1. Under Alternative 1, the potential presence of MEC/MPPEH would continue to pose unacceptable hazard to potential future receptors at the Adjacent Property.

##### **Alternative 2 – Munitions Removal, On-Site Demilitarization of MEC, and Off-Site Recycling of MDAS**

Under Alternative 2, a complete evaluation would be conducted to document the nature and distribution of munitions at the Adjacent Property, followed by removal of munitions that pose a threat to human health and the environment. The removal would be guided by geophysical surveys in an iterative process. Following each step of the removal, geophysical surveys would be conducted to verify that metallic objects or anomalies have been removed. The overall scope of Alternative 2 would include:

- Surveying in 200-foot by 200-foot grids throughout the approximately 43-acre investigation area in support of surface clearance activities and geophysical investigation with detector-aided visual methods and DGM;
- Surface clearance of any metallic objects that may interfere with DGM, including intentional contact with MPPEH;
- Vegetation trimming on approximately 33 acres within Area A in support of the TCRA;
- DGM followed by data analysis on approximately 26 acres on the hillside immediately west of IRP Site 1 (Area A);
- Detector-aided visual investigation on approximately 7 acres within the hillside immediately to the west of IRP Site 1 (Area A) that are inaccessible to DGM due to steep terrain;
- Detector-aided visual investigation on approximately 5 acres within the Agua Chinon Retarding Basin (Area B), and approximately 5 acres to the west of Agua Chinon Wash (Area C);
- Characterization of anomaly sources as one of the following: CD, MDAS, MDEH, or MEC by UXO-qualified personnel. Any items determined to be MDEH or MEC will be further evaluated as safe-to-move or items that must be detonated in-place;
- Demilitarization of MDEH and MEC items by explosive means; and

- Demilitarization of MDAS in a manner consistent with the Defense Demilitarization Manual, DoD 4160.21-M-1 by an approved vendor(s) who will shred or smelt the material.

Under Alternative 2, MDEH, MEC, and MDAS would be removed from the TCRA area and rendered safe so that it does not pose explosive safety hazard to potential human receptors under a residential reuse scenario. Following implementation of Alternative 2, the TCRA area would be released for unrestricted use, and ICs and/or access restrictions would not be required.

The estimated cost of Alternative 2 is \$842,900. The costs for implementation of Alternative 2 (estimated using the Remedial Action Cost Engineering Requirements System [RACER™] system Version 10.2.0 [RACER™ 2009]) are summarized in Table B-6. The principal cost items are geophysical surveys and removal/demilitarization of MEC items on-Site.

In summary, this alternative would eliminate explosive safety risks on the Adjacent Property, thereby providing long-term effectiveness and protection to the environment. This alternative meets the removal action objectives and is easily implementable. This alternative provides the best balance between costs and overall effectiveness based upon above mentioned factors.

#### 4.1.4 Applicable or Relevant and Appropriate Requirements

Section 300.415(j) of the NCP provides that removal actions must attain ARARs to the extent practicable, considering the exigencies of the situation.

Section 300.5 of the NCP defines applicable requirements as cleanup standards, standards of control, and other substantive environmental protection requirements, criteria, or limitations promulgated under Federal environmental or State environmental or facility siting laws that specifically address a hazardous substance, pollutant, contaminant, remedial action, location, or other circumstances at a CERCLA site.

Section 300.5 of the NCP defines relevant and appropriate requirements as cleanup standards, standards of control and other substantive requirements, criteria, or limitations promulgated under Federal environmental or State environmental or facility siting laws that, while not “applicable” to a hazardous substance, pollutant, or contaminant, remedial action, location, or other circumstances at a CERCLA site, address problems or situations sufficiently similar to those encountered at the CERCLA site and are well-suited to the particular site.

Because CERCLA onsite response actions do not require permitting (42 U.S.C. § 9621[e][1]), only substantive requirements are considered as possible ARARs. Administrative requirements such as approval of, or consultation with administrative bodies, issuance of permits, documentation, reporting, recordkeeping, and enforcement are not ARARs for CERCLA actions confined to the site. Pursuant to the definition of the term on-site in 40 C.F.R. § 300.5, the on-Site areas for the purpose of ARARs analysis for this TCRA include:

- The on-Station portion of IRP Site 1 and any additional areas in the proximity of IRP Site 1 required for implementing response action
- The off-Station area to the west of IRP Site 1, shown on Figure A-4 as IRP Site 1, Adjacent Property, where the removal action will be conducted
- Any additional areas in the proximity of the Adjacent Property area shown on Figure A-4 required for implementing the response action.

Only those State standards that are identified by a State in a timely manner and are more stringent than Federal requirements may be ARARs (see Section 4.1.4.2 for details on State ARARs).

There are three types of ARARs. The first type includes “chemical-specific” requirements. These ARARs set limits on concentrations of specific hazardous substances, contaminants, and pollutants in the environment. Examples of this type of ARAR are ambient water quality criteria and drinking water standards. The second type of ARAR includes location-specific requirements that set restrictions on certain types of activities based on site characteristics. These include restrictions on activities in wetlands, floodplains, and historic sites. The third type of ARAR includes action-specific requirements. These are technology-based restrictions, which are triggered by the type of action under consideration. Examples of action-specific ARARs are RCRA regulations for waste treatment, storage, and disposal.

ARARs must be identified on a site-specific basis from information about specific chemicals at the site, specific features of the site location, and actions that are being considered as removal actions. The discussion that follows is an ARARs analysis for the most salient ARARs for the selected alternative. It may include ARARs that potentially apply, but are eliminated when actual fieldwork provides more specific information.

#### 4.1.4.1 FEDERAL ARARs

As the lead federal agency, the DON has primary responsibility for identification of potential ARARs for IRP Site 1. The process of identifying and evaluating Federal ARARs by the DON is described in this subsection.

The Federal government implements a number of environmental statutes that are a source of potential Federal ARARs either in the form of the statutes themselves or regulations promulgated thereunder. The removal action was reviewed against all potential ARARs, including but not limited to those set forth at 55 Federal Register (Fed. Reg.) 8764–8765 (1990), in order to determine whether they are applicable or relevant and appropriate utilizing CERCLA and NCP criteria and procedures for ARARs identification by lead federal agencies.

The federal statutes or regulations that constitute ARARs for the selected removal action alternative are discussed in Tables B-1 through B-3 (all tables are provided in Appendix B). The important issues pertaining to ARARs evaluation are summarized in the subsections below.

### **General Approach to Requirements of the Federal Resource Conservation and Recovery Act**

The preamble to the NCP indicates that state regulations that are components of a federally authorized or delegated state program are generally considered federal requirements and potential federal ARARs for the purposes of ARARs analysis (55 Fed. Reg. 8666, 8742 [1990]). The State of California received approval for its base RCRA hazardous waste management program on 23 July 1992 (57 Fed. Reg. 32726 [1992]). The State of California “Environmental Health Standards for the Management of Hazardous Waste,” set forth in Title 22 California Code of Regulations, Division 4.5 (Cal. Code Regs. tit. 22, div. 4.5), were approved by U.S. EPA as a component of the federally authorized State of California RCRA program. On 26 September 2001, California received final authorization of its revised State Hazardous Waste Management Program from U.S. EPA (63 Fed. Reg. 49118 [2001]).

The regulations of Cal. Code Regs. tit. 22, div. 4.5 are therefore a source of potential federal ARARs for CERCLA response actions. The exception is when a state regulation is “broader in scope” than the corresponding federal RCRA regulations. In that case, such regulations are not considered part of the federally authorized program or potential federal ARARs. Instead, they are purely state law requirements and potential state ARARs.

A key threshold question for the ARARs analysis is whether the contaminants in the Adjacent Property area constitute federal hazardous waste as defined under RCRA and the state’s authorized

program or qualify as non-RCRA, state-regulated hazardous waste. A discussion of waste characterization is provided under the description of Federal and State Chemical-Specific ARARs below.

### **DON and DTSC's Position Regarding RCRA Permit and Closure Requirements**

The State of California (DTSC) maintains that the DON operated an open burn/open detonation (OB/OD) facility within the IRP Site 1 investigation area. DTSC stated in the letter to DON (dated 19 March 2001) that the OB/OD facility received interim status authorization between 8 June 1988 and 31 December 1991. It further stated that OB/OD facility operated without any authorization from DTSC between 1 January 1992 to July 1999, in violation of state law; therefore, RCRA closure and post-closure requirements specified in Chapter 6.5 of the California Health and Safety Code and Cal. Code Regs. tit. 22 § 66265.112 apply to the OB/OD unit.

The DON used munitions at the EOD Training Range for their intended purpose, including the training of military personnel, and explosives and emergency response specialists, and such training is neither waste treatment nor disposal. Therefore, the DON maintains that activities conducted at the former EOD Training Range were not regulated under the RCRA.

Both DON's and DTSC's positions have been documented in the Phase II RI Work Plan (Earth Tech 2001d), Phase II RI Report for IRP Site 1 (Earth Tech 2006), and the Draft Final Vadose Zone Feasibility Study Report for IRP Site 1 (Earth Tech 2008). To facilitate resolution of the differing positions, the DON indicated that it would incorporate the substantive provisions of the State's RCRA closure and post-closure requirements into the CERCLA related documentation for IRP Site 1. This position was acknowledged by the DTSC in a letter dated 19 March 2000 and in letters dated 19 March 2001 and 21 June 2006 for the Feasibility Study.

### **Federal Chemical-Specific ARARs**

Ammunition products produced or owned by the DoD are regulated under the Military Munitions Rule (62 Fed. Reg. 6621, 12 February 1997). The Military Munitions Rule identifies when conventional and chemical military munitions become solid and hazardous wastes under RCRA. It also identifies requirements for safe storage and transport of such waste. The requirements for military munitions have been consolidated into 40 C.F.R. § 266 subpt. M with appropriate references to other requirements (e.g., treatment and disposal). The substantive provisions of these requirements are sources of potential federal ARARs for the selected response action that includes storage and disposal of munitions or waste that contains munitions.

This TCRA is being conducted to address munitions adjacent to the former EOD Training Range. Therefore, the requirements of Military Munitions Rule at 40 C.F.R. § 266.202(d) that specify when used or fired military munitions that land off-range become solid waste constitute ARARs for determining whether the recovered munitions from TCRA area constitute solid wastes.

In accordance with the requirements of 40 C.F.R. § 266.202(d), a used or fired military munition is a solid waste, if the munition lands off-range and is not promptly rendered safe and/or retrieved. Therefore, the military munitions currently present outside the boundary of the former EOD Training Range constitute solid wastes.

**RCRA Hazardous Waste Determination:** A military munition is classified as hazardous waste under RCRA if it is a "listed" waste or exhibits a hazardous waste characteristic. The RCRA requirements at Cal. Code Regs. tit. 22, § 66261.21, 66261.22(a)(1), 66261.23, 66261.24(a)(1), and 66261.100 are applicable federal ARARs because they define RCRA hazardous waste.

Available historical site information indicates that the likely sources of MEC in soil in the TCRA area are past EOD training operations within IRP Site 1 involving the use of military ordnance. Based on this information, munitions recovered from the TCRA area and metallic scrap following demilitarization of MEC/MPPEH items will not be classified as RCRA listed waste. By extension of this reasoning, the residuals generated during the TCRA will not be classified as RCRA-listed hazardous waste either.

The MEC and MPPEH (characterized as MDEH) items recovered from the TCRA area are expected to exhibit the following reactivity characteristics of RCRA hazardous waste stipulated in Cal. Code Regs. tit. 22, § 66261.23(a)(6) and (a)(7):

- Capable of detonation or explosive reaction if subjected to a strong initiating source or if heated under confinement; or
- Capable of detonation or explosive decomposition or reaction at standard temperature and pressure.

Therefore, MEC and MDEH items recovered from the TCRA area will be classified as RCRA-characteristic or D003 (reactive) hazardous waste.

### **Federal Location-Specific ARARs**

The habitat assessment conducted at IRP Site 1 in December 2000 reported that the dominant vegetation types consist of non-native grassland, CSS, and toyon-sumac chaparral. However, significant portions of vegetation on and adjacent to IRP Site 1 were burned during the October 2007 Santiago Canyon wild fire. The wildlife documented at IRP Site 1 includes: one reptile, 36 amphibians, and six mammalian species. Additionally two special status species (those listed by the State and Federal agencies as endangered, threatened, rare, or of special concern) were documented at IRP Site 1, including the Riverside fairy shrimp and the California gnatcatcher. California gnatcatchers are a federally threatened species and were identified at IRP Site 1.

Protected species have been documented at IRP Site 1 and there is a potential for California gnatcatchers to be present on the Adjacent Property west of IRP Site 1. A biological survey was completed in 2001 of the TCRA areas as part of preparation of the Environmental Impact Report (EIR) for Northern Sphere Area (City of Irvine 2001). No federal-listed endangered or threatened species were observed in the TCRA areas during this survey. Least Bell's Vireo (*Vireo belli pusillus*) (LBV) was observed in the vicinity of the TCRA areas during the 2001 survey, and has at least some potential to occur on or in the immediate vicinity of the TCRA areas. In addition, the plant, thread-leaved brodiaea (*Brodiaea filifolia*) has limited potential to occur in the TCRA areas. LBV is federal-listed endangered species (CDFG 2001a). Thread-leaved brodiaea is a federal-listed threatened species (CDFG 2010b). Since there is potential for protected species to be present on the TCRA area, the TCRA will need to comply with substantive provisions of the Endangered Species Act of 1973 (16 U.S.C. § 1536[a], [h][1][B]; 16 U.S.C. § 1538[a][1][B]and [G]).

Consultation regulations at 50 C.F.R. pt. 402 are administrative in nature and are therefore not ARARs. However, the DON will take measures to ensure compliance with substantive provisions of the Endangered Species Act identified as ARARs during the removal action. These measures will be discussed in detail in the Removal Action Work Plan and will include:

1. Identification of potential adverse impacts of the removal action activities on species protected by the Endangered Species Act and their critical habitat (CSS).

2. If any adverse impacts to species protected by the Endangered Species Act or CSS are identified, mitigation measures will be proposed.

The October 2007 Santiago Canyon wild fire burned significant portions of the vegetation, including CSS and cactus patches. The vegetation is recovering and does not represent mature CSS. The Removal Action Work Plan discussing the potential issues will be submitted to the United States Fish and Wildlife Service for review and comment prior to initiation of the removal action.

Migratory birds have been documented at IRP Site 1 and may be present on the Adjacent Property; therefore substantive requirements of Migratory Bird Treaty Act (MBTA) of 1972 (16 U.S.C. § 703) are relevant and appropriate for the TCRA. It is the DON's position that MBTA is not legally applicable to DON actions; however, the DoD recently signed (July 2006) a Memorandum of Understanding (MOU) with the United States Fish and Wildlife Service. The MBTA will continue to be evaluated as a potentially relevant and appropriate requirement for DON CERCLA response actions.

No TCRA operations will be conducted in the immediate vicinity of the bermed ephemeral pond; they will not have adverse impacts on the Riverside fairy shrimp. A qualified biologist will perform monitoring during the removal action operations. The biological monitor will search for and provide avoidance measures for active bird nests within one week prior to the vegetation trimming operations. If any birds protected by the MBTA or the Federal Endangered Species Act are found to be nesting, said nests will be marked by the biological monitor for avoidance by the activities including vegetation trimming, geophysical investigations, and demolition operations.

### **Federal Action-Specific ARARs**

Action-specific ARARs are technology- or activity-based requirements or limitations for removal activities. These requirements are triggered by the particular activities conducted at the site. The following major activities will be conducted as part of the selected TCRA alternative:

- Intrusive investigation and removal of subsurface MEC/MPPEH
- On-site transportation of MEC/MPPEH
- On-site temporary storage of MEC/MPPEH
- MEC/MDEH demilitarization
- Disposal of scrap metal generated from MEC/MPPEH

No action-specific ARARs are identified for geophysical surveys. The action-specific ARARs for the remaining activities are discussed below.

**Intrusive Investigation and Removal of Subsurface MEC/MPPEH:** Fugitive dust may be generated if large-scale excavation operations are undertaken using heavy equipment. The selected TCRA alternative would need to comply with the air emissions requirements of the South Coast Air Quality Management District (SCAQMD). Requirements that have been incorporated into the State Implementation Plan (SIP) and are therefore considered to be federal ARARs include SCAQMD Rules 403, 404, and 405. These rules are discussed in Table B-3.

**On-site Transportation of MEC/MPPEH:** As discussed above in Federal Chemical-Specific ARARs, the MEC and MDEH items recovered from the TCRA area will be considered a RCRA characteristic or D003 (reactive) hazardous waste. However, transportation of hazardous waste munitions are exempted from RCRA hazardous waste transporter requirements provided the following conditions specified in Military Munitions Rule at 40 C.F.R. § 266.203(a)(1) are satisfied:

1. The waste military munitions are not chemical agents or chemical munitions;
2. The waste military munitions must be transported in accordance with the DoD shipping controls applicable to the transport of military munitions;
3. The waste military munitions must be transported from a military owned or operated installation to a military owned or operated treatment, storage, or disposal facility; and
4. The transporter of the waste must provide oral notice to the Director within 24 hours from the time the transporter becomes aware of any loss or theft of the waste military munitions, or any failure to meet a condition of paragraph (a)(1) of this section that may endanger health or the environment. In addition, a written submission describing the circumstances shall be provided within 5 days from the time the transporter becomes aware of any loss or theft of the waste military munitions or any failure to meet a condition of paragraph (a)(1) of this section.

The above requirements at 40 C.F.R. § 266.203(a)(1)(i)-(iii) constitute ARARs for on-site transportation of recovered munitions. The munitions recovered from TCRA area will not include chemical agents or chemical munitions, and will be transported in accordance with DoD shipping controls. Although the TCRA area are not owned by the Navy, exclusion zones will be marked during the implementation of the removal action and these areas will be under the control of the Navy. The munitions will be transported from the Adjacent Property to IRP Site 1 which is owned by the DON.

The requirements in 40 C.F.R. § 266.203(a)(1)(iv) pertaining to notification to the Director (U.S. EPA Regional Administrator) are procedural in nature; nonetheless DON will notify the Regional Administrator.

**On-site Storage of MEC/MPPEH:** Similar to transportation, storage of hazardous waste munitions are exempted from RCRA hazardous waste storage requirements provided the following conditions specified in Military Munitions Rule at 40 C.F.R. § 266.205(a)(1) are satisfied:

1. The waste military munitions are not chemical agents or chemical munitions;
2. The waste military munitions must be subject to the jurisdiction of the Department of Defense Explosives Safety Board (DDESB);
3. The waste military munitions must be stored in accordance with the DDESB storage standards applicable to waste military munitions;
4. Within 90 days of August 12, 1997 or within 90 days of when a storage unit is first used to store waste military munitions, whichever is later, the owner or operator must notify the Director of the location of any waste storage unit used to store waste military munitions for which the conditional exemption in paragraph (a)(1) is claimed;
5. The owner or operator must provide oral notice to the Director within 24 hours from the time the owner or operator becomes aware of any loss or theft of the waste military munitions, or any failure to meet a condition of paragraph (a)(1) that may endanger health or the environment. In addition, a written submission describing the circumstances shall be provided within 5 days from the time the owner or operator becomes aware of any loss or theft of the waste military munitions or any failure to meet a condition of paragraph (a)(1) of this section;
6. The owner or operator must inventory the waste military munitions at least annually, must inspect the waste military munitions at least quarterly for compliance with the conditions of paragraph (a)(1) of this section, and must maintain records of the findings of these inventories and inspections for at least three years; and

7. Access to the stored waste military munitions must be limited to appropriately trained and authorized personnel.

The above requirements at 40 C.F.R. § 266.205(a)(1)(i)-(iii) and (vii) constitute ARARs for on-site temporary storage of recovered munitions. The waste munitions recovered from the Adjacent Property will not be chemical agents/munitions and will be subject to jurisdiction of and stored in accordance with DDESB storage standards. Access to stored munitions during this TCRA will be limited to appropriately trained and authorized personnel.

The requirements in 40 C.F.R. § 266.203(a)(1)(iv) – (vi) are procedural in nature and therefore do not constitute ARARs for the TCRA ; nonetheless DON will notify the Regional Administrator.

**MEC/MDEH Detonation:** MEC/MDEH detonation operations as part of this TCRA will be conducted to respond to the “Explosives or munitions emergency” as defined in 40 C.F.R. § 260.10:

*“Explosives or munitions emergency means a situation involving the suspected or detected presence of unexploded ordnance (UXO), damaged or deteriorated explosives or munitions, an improvised explosive device (IED), other potentially explosive material or device, or other potentially harmful military chemical munitions or device, that creates an actual or potential imminent threat to human health, including safety, or the environment, including property, as determined by an explosives or munitions emergency response specialist. Such situations may require immediate and expeditious action by an explosives or munitions emergency response specialist to control, mitigate, or eliminate the threat.”*

The demilitarization of MEC/MDEH items conducted to control, mitigate, or eliminate the actual or potential threat will be conducted in compliance with the substantive requirements of 40 C.F.R. § 266.204 (see Table B-3). In accordance with the provisions of 40 C.F.R. § 266.204, the following requirements will be applicable to MEC/MDEH detonation:

- *40 C.F.R. § 262.10(i):* In accordance with this provision, the persons responding to an explosives or munitions emergency are not required to comply with the standards of 40 CFR Part 262 (Standards Applicable to Generators of Hazardous Waste).
- *40 C.F.R. § 263.10(e):* In accordance with this provision, the regulations in 40 C.F.R. Part 263 (Standards Applicable to Transporters of Hazardous Waste ) do not apply to transportation during an explosives or munitions emergency response.
- *Cal. Code Regs. tit. 22, § 66264.1(g)(8):* In accordance with this provision, the requirements in Cal. Code Regs. tit. 22, Chapter 14 (Standards for Owners and Operators of Hazardous Waste Transfer, Treatment, Storage, and Disposal Facilities) do not apply to a person engaged in treatment or containment activities during immediate response to a discharge of a hazardous waste.
- *Cal. Code Regs. tit. 22, § 66265.1(e)(11):* In accordance with this provision, the requirements in Cal. Code Regs. tit. 22, Chapter 15 (Interim Status Standards for Owners and Operators of Hazardous Waste Transfer, Treatment, Storage, and Disposal Facilities) do not apply to a person engaged in treatment or containment activities during immediate response to a discharge of a hazardous waste.

**Disposal of Scrap Metal Generated from MPPEH:** MEC/MDEH items recovered during the implementation of the TCRA would be demilitarized to render them non-energetic or inert, and to remove resemblance of the MEC items to ordnance. Since the metallic scrap following demilitarization would be essentially inert, it would not meet the definition of military munition

provided in 40 C.F.R. § 260.10, and would be disposed of off-Station in accordance with applicable regulations. ARARs do not apply to off-site actions. Off-site actions need to comply with all applicable requirements.

#### 4.1.4.2 STATE ARARs

As the lead state agency, the DTSC is primarily responsible for identifying state ARARs for response actions at IRP Site 1. The DTSC and/or other state and local agencies have identified a list of potential ARARs as part of the RI/FS process at IRP Site 1. In addition, the California Department of Fish and Game identified a list of potential ARARs for this removal action in November 2009. These ARARs were evaluated for relevance to the selected TCRA alternative and incorporated as appropriate in this AM.

The following chronology summarizes the DON's efforts to obtain state assistance with identification of state ARARs for the response action at IRP Site 1. DON sent a letter to DTSC requesting identification of State ARARs on 19 October 2009. On 19 November 2009, DTSC noted via email that it would be proper for the Navy to utilize the ARARs previously identified by the state agencies in 2006 and in the previous munitions characterization work done at IRP Site 1. In addition, as mentioned above, a list of potential ARARs identified by the California Department of Fish and Game for this removal action was received in an electronic mail from DTSC on 30 November 2009.

Response action alternatives identified for this TCRA are similar to alternatives evaluated in the Draft Final FS for vadose zone soil. Consistent with DTSC's recommendation, this AM evaluated the potential ARARs identified during the FS and the California Department of Fish and Game for this removal action. The following ARAR chronology and discussion has been developed in response to State ARARs identified for the Draft Final FS.

The DTSC identified the first set of potential state ARARs for the CERCLA response action at IRP Site 1 in a letter dated 19 March 2001. This letter acknowledged the receipt of the DON's responses to DTSC comments on the Draft Final Work Plan and Health and Safety Plan for Phase II RI at IRP Site 1 (Earth Tech 2001c). In addition, the letter identified certain provisions of RCRA closure and post-closure requirements for interim status facilities at Cal. Code Regs. tit. 22, § 66265 as potential ARARs for the response action at IRP Site 1. As a result, the DON is evaluating and incorporating the substantive provisions of the RCRA closure and post closure requirements into the various CERCLA related documents.

As a part of RI/FS process, the DON formally requested state chemical-, location-, and action-specific ARARs for IRP Site 1 on March 31, 2006. The letter was sent to the DTSC soliciting ARARs based on preliminary remedial technologies and process options for the IRP Site 1 soil (including MEC) and groundwater response actions detailed to the agencies by the DON.

Following the DON solicitation for ARARs from DTSC, DTSC requested ARARs from other state and local agencies.

The DON received a letter from the DTSC (dated 21 June 2006) providing list of potential state ARARs for IRP Site 1. The letter also included list of potential ARARs from the following agencies:

- California Air Resources Board (letter dated 18 May 2006)
- California Department of Fish and Game (letter dated 8 May 2006)
- California Department of Health Services (letter dated 23 May 2006)

- California Integrated Waste Management Board (letter dated 9 May 2006)
- South Coast Air Quality Management District (letter dated May 30, 2006)

The DON received a letter (dated 12 May 2006) directly from the California RWQCB, Santa Ana Region providing list of potential ARARs for IRP Site 1. In addition, the DON received a letter (dated 23 May 2006) from the Orange County Sanitation District providing a list of local requirements for IRP Site 1; however, these requirements are not considered to be ARARs. These letters are provided in Appendix C.

### **State Chemical-Specific ARARs**

State RCRA requirements included within the U.S. EPA-authorized RCRA program for California are considered to be potential federal ARARs and are discussed under the subsection “Federal Chemical-Specific ARARs” above.

Based on the definition of the non-RCRA hazardous waste at Cal. Code Regs. tit. 22, § 66261.3(a)(2)(C) or 66261.3(a)(2)(F), 66261.22(a)(3) and (4), 66261.24(a)(2)–(a)(8), 66261.101(a)(1) and (a)(2), MEC and MDEH recovered during the TCRA will not be classified as non-RCRA hazardous wastes. In addition, the MDAS and metallic scrap following demilitarization do not constitute non-RCRA hazardous wastes.

### **State Action-Specific ARARs**

Fugitive dust may be generated if large-scale excavation operations are undertaken using heavy equipment during intrusive investigations/removal of MEC/MPPEH. The selected TCRA alternatives would comply with SCAQMD requirements for air emissions. Requirements that have not been incorporated into the SIP and are therefore considered to be state ARARs includes Rule 401. More details on Rule 401 are presented in Table B-5.

#### **4.1.5 Project Schedule**

The removal action at the Adjacent Property is scheduled to begin in February 2010 and is expected to be completed by April 2010. A draft removal action completion report would be available to the agencies within two months after fieldwork completion. The anticipated schedule for this removal action is presented in Figure A-5.

## **4.2 ESTIMATED COSTS**

The estimated costs for the selected removal action are presented in Table B-6 and include the direct and indirect capital costs. The costs consist of the following:

- Direct Capital Costs
  - Surface Clearance of Metallic Objects
  - Vegetation Trimming
  - Geophysical Investigation
  - Intrusive Anomaly Investigation
  - Demilitarization of Items Identified as MEC
  - Recycling of MDAS

- Indirect capital costs include engineering and design expenses.

The cost estimates for the remedial alternatives were generated using RACER™ 2009, which is a parametric cost modeling system that uses a patented methodology for estimating costs. The RACER™ 2009 cost technologies are based on generic engineering solutions for environmental projects, technologies, and processes. The generic engineering solutions were derived from historical project information, industry data, government laboratories, construction management agencies, vendors, contractors, and engineering analysis.

## **5. EXPECTED CHANGE IN THE SITUATION SHOULD ACTION BE DELAYED OR NOT TAKEN**

If action should be delayed or not taken, potential MEC/MPPEH items would continue to pose unacceptable explosive safety hazard to potential receptors at the Adjacent Property. In addition, there is a potential for buried MEC/MPPEH items to be exposed due to soil erosion. MEC/MPPEH could further migrate from the site to nearby areas via wind erosion and/or surface water runoff as some MEC/MPPEH items that were initially deposited as kick-outs have likely rolled down the hillside into the gullies leading from IRP Site 1. This distribution of MEC/MPPEH items due to gravitational transport would result in an increased health risk to the exposed population.

## **6. PUBLIC INVOLVEMENT**

As the lead agency, the DON initiated a Community Relations Program (CRP) in 1991 in coordination with U.S. EPA, California DTSC Region 4, and the California RWQCB. The CRP is intended to solicit community input and to keep the community informed as to on-going station activities.

In accordance with 40 CFR 300.415(n), a notice of availability of the Administrative Record File will be published in the local newspapers within 60 days of signing the Action Memorandum. Pertinent documents from the Administrative Record File will be made available for public review at Southwest Division, Naval Facilities Engineering Command, San Diego and at former MCAS El Toro. A partial record file will be available for review at the Information Repository, which will contain a complete index of the Administrative Record File along with information about how to access the complete file at the Station.

## **7. OUTSTANDING POLICY ISSUES**

There are no outstanding policy issues at this time.

This Page Intentionally Left Blank

## 8. RECOMMENDATION

The Action Memorandum was prepared in accordance with current U.S. EPA and U.S. Navy guidance documents for TCRA's under CERCLA. This Action Memorandum documents, for the Administrative Record, the DON's decision to undertake a TCRA on the property adjacent to IRP Site 1 (the Adjacent Property) at former MCAS El Toro, California.

In arriving at this decision, two alternatives were identified, evaluated, and ranked. The alternatives included:

- Alternative 1 – No Action
- Alternative 2 – Munitions Removal, On-Site Demilitarization of MEC, and Off-Site Recycling of MDAS

Based on the comparative analysis of the removal action alternatives completed in Section 4.1.3, the recommended removal action is Alternative 2. This alternative entails removal of MEC items based on the geophysical surveys from the identified geophysical anomalies on IRP Site 1, Adjacent Property.

Alternative 2 is recommended since MEC would be removed from the Adjacent Property to the extent that it does not pose elevated explosive safety risk to potential human receptors under a residential reuse scenario. Following implementation of Alternative 2 the TCRA area would be released for unrestricted use, and ICs and access restrictions would not be required. Implementation of this TCRA requires experienced personnel; these personnel with the requisite training and experience are readily available. Equipment and materials are readily available to implement this alternative. The selected removal action alternative is cost effective since it will result in a permanent reduction in risk to human health.

This decision document represents the selected removal action for MEC at the Adjacent Property, former MCAS El Toro, California resulting from historical activities conducted within IRP Site 1, developed in accordance with CERCLA as amended, and is consistent with the NCP. This decision is based on the administrative record for the site.

2/5/2010

Task Progress Milestone Summary

## Appendix B – Tables

This Page Intentionally Left Blank

**Table B-1  
Federal Chemical-Specific<sup>a</sup> ARARs**

Requirement	Prerequisite	Citation <sup>b</sup>	ARAR Determination	Comments
<b>Resource Conservation and Recovery Act (42 U.S.C., ch. 82, §§ 6901–6991[i])<sup>c</sup></b>				
Defines RCRA hazardous waste. A solid waste is characterized as toxic, based on the TCLP, if the waste exceeds the TCLP maximum concentrations.	Presence of Waste.	Cal. Code Regs. tit. 22, § 66261.21, 66261.22(a)(1), 66261.23, 66261.24(a)(1), and 66261.100	Applicable	Applicable for determining whether recovered MEC/MPPEH items during the TCRA constitute RCRA-hazardous waste. As discussed in detail in Section 4.1.4.1, the MEC and MPPEH (characterized as MDEH) items recovered from the TCRA areas will exhibit the reactivity characteristic of RCRA hazardous waste and will therefore be considered a RCRA characteristic or D003 (reactive) hazardous waste. The MDAS following demilitarization will be inert and will not exhibit the characteristics of RCRA hazardous waste.
<b>Military Munitions Rule (40 C.F.R. pt. 266 subpt. M)<sup>c</sup></b>				
Identification of hazardous waste munitions and treatment and storage requirements for hazardous waste munitions.	Storage of military munitions.	40 C.F.R. § 266.202 (d)	Applicable	Applicable for determining whether military munitions are solid wastes. The TCRA for IRP Site 1 is being conducted to address potential explosive safety hazards presented by munitions kick-outs that may have landed outside the former EOD Training Range. In accordance with the requirements of 40 C.F.R. § 266.202 (d), munition that lands off-range and is not promptly rendered safe and/or retrieved, is a solid waste. Therefore, munitions potentially present in the TCRA areas are solid wastes under RCRA.

Notes:

- <sup>a</sup> many action-specific ARARs contain chemical-specific limitations and are addressed in the action-specific ARAR tables
- <sup>b</sup> only the substantive provisions of the requirements cited in this table are ARARs
- <sup>c</sup> statutes and policies, and their citations, are provided as headings to identify general categories of ARARs for the convenience of the reader; listing the statutes and policies does not indicate that the DON accepts the entire statutes or policies as ARARs; specific ARARs are addressed in the table below each general heading; only pertinent substantive requirements of the specific citations are considered ARARs

**Table B-2  
Federal Location-Specific ARARs**

<b>Location</b>	<b>Requirement</b>	<b>Prerequisite</b>	<b>Citation<sup>a</sup></b>	<b>ARAR Determination</b>	<b>Comments</b>
<b>Endangered Species Act of 1973 (16 U.S.C. §§ 1531–1543)<sup>a</sup></b>					
Habitat upon which endangered species or threatened species depend	Federal agencies may not jeopardize the continued existence of any listed species or cause the destruction or adverse modification of critical habitat. The Endangered Species Committee may grant an exemption for agency action if reasonable mitigation and enhancement measures such as propagation, transplantation, and habitat acquisition and improvement are implemented.	Determination of effect upon endangered or threatened species or its habitat. Critical habitat upon which endangered or threatened species depend.	16 U.S.C. § 1536(a), (h)(1)(B); 16 U.S.C. § 1538(a)(1)(B) and (G)	Applicable	Since protected species have been documented at IRP Site 1 and there is a potential for California gnatcatchers, least bell’s vireo, and thread-leaved brodiaea to be present in removal action area (see Section 4.1.4.1 for details), substantive provisions of the cited regulations constitute ARARs for the TCRA. Further discussion on compliance with Endangered Species Action including proposed preliminary measures to protect California gnatcatchers are presented in Section 4.1.4.1.
<b>Migratory Bird Treaty Act of 1972 (16 U.S.C. §§ 703–712)<sup>a</sup></b>					
Migratory bird area	Protects almost all species of native migratory birds in the U.S. from unregulated “take,” which can include poisoning at hazardous waste sites.	Presence of migratory birds.	16 U.S.C. § 703	Relevant and Appropriate	It is the DON’s position that Migratory Bird Treaty Act is not legally applicable to DON actions; however, the Department of Defense (DoD) recently signed (July 2006) a Memorandum of Understanding (MOU) with the United States Fish and Wildlife Service. The Migratory Bird Treaty Act will continue to be evaluated as a potentially relevant and appropriate requirement for DON CERCLA response actions.  Migratory birds have been observed at IRP Site 1; therefore, the substantive requirements of the cited act are “relevant and appropriate” ARARs. The measures proposed to be taken to protect migratory birds during TCRA operations are discussed in Section 4.1.4.1.

CERCLA – Comprehensive Environmental Response, Compensation, and Liability Act

DoD – Department of Defense

DON – Department of the Navy

IRP – Installation Restoration Program

MOU – Memorandum of Understanding

§ – section

TCRA – Time-Critical Removal Action

U.S.C. – *United States Code*

**Table B-3  
Federal Action-Specific ARARs**

<b>Action</b>	<b>Requirement</b>	<b>Prerequisite</b>	<b>Citation</b>	<b>ARAR Determination</b>	<b>Comments</b>
<b>Resource Conservation and Recovery Act (42 U.S.C. §§ 6901–6991[i])*</b>					
On-site waste generation	Person who generates waste shall determine if that waste is a hazardous waste.	Generator of waste.	Cal. Code Regs. Tit. 22, § 66262.10(a), 66262.11	Applicable	Applicable for determining whether wastes generated during the TCRA are hazardous (see Table 2-1 for details).
<b>Military Munitions Rule (40 C.F.R. pt. 266 subpt. M)*</b>					
Military munitions	Standards for transportation of solid waste military munitions	Management of solid waste military munitions.	40 C.F.R. § 266.203(a)(1)(i) – (iii), (a)(3), (a)(4), and (c)	Applicable	The requirements in 40 C.F.R. § 266.203(a)(1)(i)-(iii) constitute ARARs for on-site transportation of recovered munitions. The requirements in 40 C.F.R. § 266.203(a)(1)(iv) pertaining to notification to the Director (U.S. EPA Regional Administrator) are procedural in nature; nonetheless, DON will notify the Regional Administrator (see Section 4.1.4.1 for details).
Military munitions	Standards for storage of solid waste military munitions	Management of solid waste military munitions.	40 C.F.R. § 266.205(a)(1), (a)(3), and (e)	Applicable	The substantive provisions of the cited regulations constitute ARARs for on-site storage of military munitions recovered from TCRA areas. The recovered munitions from TCRA areas will be stored in accordance with the DoD storage standards (see Section 4.1.4.1 for detailed discussion)

(Continued)

**Table B-3 (Continued)  
Federal Action-Specific ARARs**

<b>Action</b>	<b>Requirement</b>	<b>Prerequisite</b>	<b>Citation</b>	<b>ARAR Determination</b>	<b>Comments</b>
Military munitions	Explosives and munitions emergencies involving military munitions or explosives are subject to 40 CFR 262.10(i), 263.10(e), 264.1(g)(8), 265.1I(11), and 270.1I(3), or alternatively to 40 CFR 270.61.	Hazardous waste military munitions.	40 C.F.R. § 266.204	Applicable	<p>The requirements of 40 C.F.R. § 266.204 are applicable to situations during TCRA that satisfy the definition of explosives or munitions emergency presented in 40 C.F.R. § 260.10. The demilitarization of MEC/MDEH items conducted to control, mitigate, or eliminate the actual or potential threat encountered during an explosives or munitions emergency will be conducted in compliance with 40 C.F.R. § 266.204 and cross-referenced requirements in 40 C.F.R. § 266.204 identified as ARARs in this table (see Section 4.1.4.1 for detailed discussion).</p> <p>The cross-referenced requirements in the 40 C.F.R. § 266.204 (i.e. 40 CFR 262.10[i], 263.10[e], 264.1[g][8], 265.1[c][11], and 270.1[c][3], and 40 CFR 270.61) that constitute ARARs for the TCRA are presented below. It should be noted that for the reasons explained in detail in Section 4.1.4.1, the cross-referenced requirements for which equivalent requirements exist in Cal. Code Regs., tit. 22; Cal. Code Regs., tit. 22 requirements were evaluated as ARARs (see ARAR evaluation for Cal. Code Regs., tit. 22, §§ 66264.1[g][8] and 66265.1[e][11] below).</p>

(Continued)

**Table B-3 (Continued)  
Federal Action-Specific ARARs**

<b>Action</b>	<b>Requirement</b>	<b>Prerequisite</b>	<b>Citation</b>	<b>ARAR Determination</b>	<b>Comments</b>
Military munitions	Persons responding to an explosives or munitions are not required to comply with the standards of 40 C.F.R. Part 262 (Standards Applicable to Generators of Hazardous Waste).	Response to an explosives or munitions emergency	40 C.F.R. § 262.10(i)	Applicable	The requirements of 40 C.F.R. § 262.10(i) are applicable to situations during TCRA that satisfy the definition of explosives or munitions emergency presented in 40 C.F.R. § 260.10. The demilitarization of MEC/MDEH items conducted to control, mitigate, or eliminate the actual or potential threat encountered during an explosives or munitions emergency will be conducted in compliance with 40 C.F.R. § 262.10(i) (see Section 4.1.4.1 for detailed discussion).
Military munitions	The regulations in 40 C.F.R. Part 263 (Standards Applicable to Transporters of Hazardous Waste) do not apply to transportation during an explosives or munitions emergency response.	Response to an explosives or munitions emergency	40 C.F.R. § 263.10(e)	Applicable	The requirements of 40 C.F.R. § 263.10(e) are applicable to situations during TCRA that satisfy the definition of explosives or munitions emergency presented in 40 C.F.R. § 260.10. The demilitarization of MEC/MDEH items conducted to control, mitigate, or eliminate the actual or potential threat encountered during an explosives or munitions emergency will be conducted in compliance with 40 C.F.R. § 263.10(e) (see Section 4.1.4.1 for detailed discussion).

(Continued)

**Table B-3 (Continued)  
Federal Action-Specific ARARs**

<b>Action</b>	<b>Requirement</b>	<b>Prerequisite</b>	<b>Citation</b>	<b>ARAR Determination</b>	<b>Comments</b>
Hazardous waste management	States that the requirements in Chapter 14 (Standards for Owners and Operators of Hazardous Waste Transfer, Treatment, Storage, and Disposal Facilities) of the Cal. Code Regs., tit. 22, do not apply to a person engaged in treatment or containment activities during immediate response to a discharge of a hazardous waste.	Hazardous waste management facility	Cal. Code Regs. tit. 22, § 66264.1(g)(8)	Applicable	The requirements of Cal. Code Regs. tit. 22, § 66264.1(g)(8) are applicable to situations during TCRA that satisfy the definition of explosives or munitions emergency presented in 40 C.F.R. § 260.10. The demilitarization of MEC/MDEH items conducted to control, mitigate, or eliminate the actual or potential threat encountered during an explosives or munitions emergency will be conducted in compliance with Cal. Code Regs. tit. 22, § 66264.1(g)(8) (see Section 4.1.4.1 for detailed discussion).
Hazardous waste management	States that the requirements in Chapter 15 (Interim Status Standards for Owners and Operators of Hazardous Waste Transfer, Treatment, Storage, and Disposal Facilities) of the Cal. Code Regs., tit. 22, do not apply to a person engaged in treatment or containment activities during immediate response to a discharge of a hazardous waste.	Interim Status Hazardous waste management facility	Cal. Code Regs. tit. 22, § 66265.1(e)(11)	Applicable	The requirements of Cal. Code Regs. tit. 22, § 66265.1(e)(11) are applicable to situations during TCRA that satisfy the definition of explosives or munitions emergency presented in 40 C.F.R. § 260.10. The demilitarization of MEC/MDEH items conducted to control, mitigate, or eliminate the actual or potential threat encountered during an explosives or munitions emergency will be conducted in compliance with Cal. Code Regs. tit. 22, § 66265.1(e)(11) (see Section 4.1.4.1 for detailed discussion)

(Continued)

**Table B-3 (Continued)  
Federal Action-Specific ARARs**

<b>Action</b>	<b>Requirement</b>	<b>Prerequisite</b>	<b>Citation</b>	<b>ARAR Determination</b>	<b>Comments</b>
Discharge to air	Provisions of SIP approved by U.S. EPA under Section 110 of CAA.	Major sources of air pollutants.	40 U.S.C. § 7410; 40 C.F.R. § 52.220	Applicable	Applicable to fugitive dust emissions that may be generated if large-scale excavation operations are undertaken using heavy equipment. Specific pertinent rules are listed below.
Discharge to air	Shall not cause or allow the emissions of fugitive dust such that the presence of such dust remains visible in the atmosphere beyond the property line of the emission source and shall not cause or allow PM10 levels to exceed 50 micrograms per cubic meter when determined, by simultaneous sampling, as the difference between upwind and downwind samples.		SCAQMD Rule 403	Applicable	Fugitive dust emissions of particulate matter are expected if large-scale excavation and grading operations are undertaken using heavy equipment. Measures such as applying water to minimize fugitive dust emissions may be required.
Air emission	Limits equipment from discharging particulate emissions in excess of 0.01 to 0.196 grain per cubic foot based on a given volumetric (dry standard cubic feet per minute) exhaust gas flow rate averaged over one hour or on cycle of operation. It excludes steam generators or gas turbines.		SCAQMD 404	Rule Applicable	If used, the heavy equipment will comply with substantive requirements of this rule.
Air emission	Limits equipment from discharging particulate emissions in excess of 0.99 to 30 pounds per hour based on a given process weight.		SCAQMD 405	Rule Applicable	If used, the heavy equipment will comply with substantive requirements of this rule.

Definition of “non-RCRA hazardous waste.”	Presence of Waste.	Cal. Code Regs. tit. 22, § 66261.3(a)(2)(C) or 66261.3(a)(2)(F), 66261.22(a)(3) and (4), 66261.24(a)(2)–(a)(8), 66261.101(a)(1) and (a)(2)	Applicable	As discussed in Table B-1, MEC and MPPEH (characterized as MDEH) items recovered from the TCRA areas will exhibit the reactivity characteristic of RCRA hazardous waste (Cal. Code Regs. tit. 22, § 66261.23) and will therefore be considered a RCRA characteristic or D003 (reactive) hazardous waste. In accordance with the provisions of Cal. Code Regs. tit. 22, § 66261.101(a), MEC and MDEH items do not constitute non-RCRA hazardous wastes. In addition, the MDAS and metallic scrap following demilitarization do not constitute non-RCRA hazardous wastes.

Notes:

- <sup>a</sup> many action-specific ARARs contain chemical-specific limitations and are addressed in the action-specific ARAR tables
- <sup>b</sup> only the substantive provisions of the requirements cited in this table are ARARs
- <sup>c</sup> statutes and policies, and their citations, are provided as headings to identify general categories of ARARs for the convenience of the reader; listing the statutes and policies does not indicate that the DON accepts the entire statutes or policies as ARARs; specific ARARs are addressed in the table below each general heading; only pertinent substantive requirements of specific citations are considered ARARs

Marine Corps Air Station El Toro  
Base Realignment and Closure  
P.O. Box 51718  
Irvine, California 92619-1718

RESPONSE TO COMMENTS, DRAFT FINAL WORK PLAN AND HEALTH AND SAFETY PLAN, PHASE II REMEDIAL INVESTIGATION, INSTALLATION RESTORATION PROGRAM (IRP) SITE 1, EXPLOSIVE ORDNANCE DISPOSAL (EOD) RANGE, MARINE CORPS AIR STATION (MCAS) EL TORO

Dear Mr. Gould:

The Department of Toxic Substances Control (DTSC) has received the Department of the Navy's responses to our December 15, 2000 comments, Draft Final Work Plan, and Health and Safety Plan on February 8, 2001. We also received a second response from the Department of the Navy (DON) on February 15, 2001.

The DON'S response reiterates the position of the United States Marine Corps (USMC) that no hazardous waste treatment of explosive ordnance occurred at Site 1, EOD Range, and that no open burn/open detonation (OB/OD) took place at that location. USMC further maintains that munitions were used at the EOD Range for their intended purpose, including training of military and explosive ordnance disposal personnel. As such, the USMC believes the use of munitions is not regulated by the Resource Conservation and Recovery Act (RCRA).

DTSC maintains that the Marine Corps' explosive ordnance detonation activities at the EOD Range included the operation of an OB/OD hazardous waste treatment unit pursuant to the RCRA Part A application submitted by the DON in June 1988. The OB/OD unit received interim status authorization between June 8, 1988 and December 31, 1991. It then operated without any authorization from DTSC between January 1, 1992 and July 1999, in violation of state law. Therefore, RCRA closure and post-closure requirements specified in Chapter 6.5 of the California Health and Safety

*The energy challenge facing California is real. Every Californian needs to take immediate action to reduce energy consumption. For a list of simple ways you can reduce demand and cut your energy costs, see our Web-site at [www.dtsc.ca.gov](http://www.dtsc.ca.gov).*

Mr. Dean Gould  
March 16, 2001  
Page 2

Code (HSC) and Title 22, California Code of Regulations (CCR), Section 66265.112 apply to the OB/OD unit located within the investigation boundary for IRP Site 1.

DTSC understands that to facilitate a settlement of the differing positions, the DON has chosen to incorporate State substantive closure and post-closure requirements as relevant and appropriate requirements (ARARs) in the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) response being taken at Site 1. As a result, the DTSC Hazardous Waste Management Program, Permitting Division will work with the Site Mitigation Program, Office of Military Facilities to ensure that RCRA closure plan requirements for the OB/OD unit are incorporated into the CERCLA cleanup process.

Additionally, RCRA post-closure requirements were not incorporated in the Draft Final Work Plan. DTSC requires that the DON add Title 22, CCR, Article 7, Sections 66265.110, 66265.111, 66265.114, 66265.115, 66265.116, 66265.117, 66265.118, 66265.119, and 66265.120 as ARARs for any selected removal or remedial action at Site 1.

Please contact Mr. Tayseer Mahmoud, Permit Writer, at (714) 484-5419 for questions regarding the OB/OD unit or Ms. Triss Chesney, Remedial Project Manager, at (714) 484-5395 for questions regarding IRP Site 1.

Sincerely,

John E. Scandura, Chief  
Southern California Branch

### REQUEST FOR IDENTIFICATION OF APPLICABLE OR RELEVANT AND APPROPRIATE REQUIREMENTS FOR INSTALLATION RESTORATION PROGRAM SITE 1 (IRP 1), FORMER MARINE CORPS AIR STATION (MCAS) EL TORO, CALIFORNIA

Dear Mr. Newton:

The Department of Toxic Substances Control (DTSC) received a request from the Department of Navy (Navy) to identify potential state chemical-specific, action-specific, and location-specific applicable or relevant and appropriate requirements (ARARs) for a potential response action at IRP Site 1. In addition, Navy requested that the State of California identify any other criteria, advisories, guidance, and proposed standards that the state requests to-be-considered (TBC) for the above site, and to coordinate responses from all California state agencies.

DTSC contacted the responsible agencies in the State of California and requested ARARs, TBC and any other additional information that will support a potential response action at IRP Site 1. The following agencies provided their statutes, rules, regulations and guidance:

- 1) The Regional Water Quality Control Board was submitted directly to the Navy on May 12, 2006.
- 2) California Integrated Waste Management Board was sent to the Navy via DTSC by electronic mail on May 9, 2006.
- 3) California Department of Fish and Game was sent to the Navy via DTSC by electronic mail on May 16, 2006.

Mr. Darren Newton  
June 21, 2006  
Page 2 of 3

- 4) California Air Resources Board was sent to the Navy via DTSC by electronic mail on May 24, 2006.
- 5) California Department of Health Services was sent to the Navy via DTSC by electronic mail on May 24, 2006.
- 6) Orange County Sanitation District was sent to the Navy via DTSC by electronic mail on May 30, 2006 and hand delivered hard copies on May 31, 2006.
- 7) South Coast Air Quality Management District was sent to the Navy via DTSC by electronic mail on June 20, 2006. Attached here please find a signed copy.
- 8) Attached to this transmittal letter, please find DTSC IRP Site 1 Potential ARARs and TBC.

Thank you for giving DTSC the opportunity to coordinate this effort. We look forward to continuing to work with you on base cleanup activities at the MCAS El Toro. If you have any questions, please call me at (714) 484-5381.

Sincerely,

Sue Hakim  
Remedial Project Manager  
Base Closure and Reuse Unit  
Office of Military Facilities

POTENTIAL DTSC CHEMICAL SPECIFIC ARARS (EI Toro Site 1)

CHEMICAL	REQUIREMENT	CRITERIA	CITATION	ARARs DETERMINATION	COMMENTS
Hazardous Waste Control Act (HWCA)  Concentration limits of regulated units effluent to groundwater, surface water, and soil	Groundwater and vadose zone protection standards: RCRA hazardous waste TSD facilities shall comply and ensure that hazardous constituents entering the groundwater, surface water, and soil from a regulated unit do not exceed the concentration limit from contaminants of concern in the uppermost aquifer underlying the waste management area beyond the point of compliance.	Hazardous waste treatment, storage, or disposal; uppermost aquifer underlying a waste management unit beyond the point of compliance.	Title 22, CCR, Div 4.5, Ch 14, §66264.94	Relevant and Appropriate	Applicable for hazardous waste TSD facilities; potentially relevant and in site-specific circumstances, such as when the source of waste is unknown but the waste is similar in composition to listed waste or when waste constituents have been released or have the potential to be released to groundwater.  This site is not a TSD facility, however, because contamination in groundwater or soil is similar in composition to listed waste, this requirement is determined to be relevant and appropriate.
Hazardous waste listing and identification	Identification of hazardous waste that poses a potential hazard to human health or the environment when it is improperly treated, stored, transported, or disposed.	Hazardous waste storage, treatment, or disposal.	Title 22, CCR, Div 4.5, Ch 11, §66261.2, §66261.3	Applicable	Excavated soil or investigation derived waste from this site may meet the definition of hazardous waste.
Hazardous waste listing and identification	TCLP regulatory levels; persistent and bioaccumulative toxic substances total threshold limit concentrations (TTLC) and soluble threshold limit concentration (STLC)	Hazardous waste storage, treatment, or disposal.	Title 22, CCR, Div 4.5, Ch 11, §66261.24	Applicable	Using the definition of hazardous waste, groundwater from this site or potentially some spent treatment medium may exceed TCLP for some of the chemicals of concern, making it a characteristic hazardous waste.

CHEMICAL	REQUIREMENT	CRITERIA	CITATION	ARARs DETERMINATION	COMMENTS
Hazardous Waste Control Act (HWCA)					
Hazardous waste listing and identification	Definition of "non-RCRA hazardous waste"	Hazardous waste storage, treatment or disposal	Title 22, CCR, Div 4.5, Ch. 11, §§ 66261.22(a)(3) and (4), 66261,24(a)(2) to (a)(8), 66261.101, 66261,3(a)(2)(C), or 66261.3(a)(2)(F)	Applicable	Waste may be found to be non-RCRA hazardous waste. Generator requirements will apply.
Primary standards – inorganic and organic chemicals	Maximum contaminant Levels (MCLs) list for drinking water.		Title 22, CCR, Div 4.5, Ch 15, §64431, §64444	Applicable	State MCLs for tap water standards are more stringent than primary federal standards.
Secondary standards	Secondary MCLs list for drinking water		Title 22, CCR, Div 4, Ch 15, § 64449	Applicable	State secondary MCLs for tap water standards
Best management practices – perchlorate	Management of perchlorate non-hazardous waste	Perchlorate containing non-hazardous waste	Title 22, CCR, Div 4.5, Ch 33, §67384.10(a)	Applicable	Must be disposed in hazardous waste landfill or in composite-lined portion of non-hazardous waste landfill

**TO BE CONSIDERED STATE ADVISORIES, GUIDANCE, AND CRITERIA, CAL/EPA, DTSC**

1. *Public Health Goal for Perchlorate in Drinking Water*  
Office of Environmental Health Hazard Assessment  
March 2004  
(OEHHA's perchlorate PHG – the concentration in drinking water that does not pose any significant risk to health – is 6 ug/L)

POTENTIAL DTSC LOCATION SPECIFIC ARARS (EI Toro Site 1)

LOCATION	REQUIREMENT	CRITERIA	CITATION	ARARs DETERMINATION	COMMENTS
Within 200 feet of a fault displacement in Holocene time	New facility for treatment, storage, or disposal of hazardous waste prohibited.	RCRA and non-RCRA (California) hazardous waste; TSD facility	Title 22, CCR, Div 4.5, Ch 14, §66264.18	Relevant and Appropriate	The locations requirements are consider relevant and appropriate for the siting of remedial systems to reduce the toxicity, volume and/or mobility of chemicals. Under RCRA, new treatment facilities shall not be located within 200 feet of a fault which has had displacement in Holocene time.
Within a 100-year floodplain	Facility must be designed, constructed, operated, and maintained to prevent washout by flood or maximum high tide.	RCRA and non-RCRA (California) hazardous waste; TSD facility	Title 22, CCR, Div 4.5, Ch 14, §66264.18	Relevant and Appropriate	The locations requirements are consider relevant and appropriate for the siting of remedial systems to reduce the toxicity, volume and/or mobility of chemicals. Under RCRA, new treatment facilities shall not be affected by a 100-year flood or maximum high tide.

<p>d. Packaging, Labeling, Marking, Placarding</p>	<p>Before transporting hazardous waste or offering hazardous waste for transportation off-site, the generator must do the following in accordance with DOT regulations: package the waste, label and mark each package of hazardous waste, and ensure that the transport vehicle is correctly placarded.</p>	<p>Generators of hazardous waste who transport or offer hazardous waste for transportation</p>	<p>Title 22, CCR, Div 4.5, Ch 12, §66262.30, §66262.31, §66262.32, §66262.33</p>	<p>Applicable</p>	<p>SCAB</p>

ACTION	REQUIREMENT	CRITERIA	CITATION	ARARs DETERMINATION	COMMENTS
e. Storage of hazardous waste on-site	Establish requirements for a generator to accumulate waste on-site for 90 days or less without a permit.	Standards for generators of hazardous waste	Title 22, CCR, Div 4.5, Ch 12, §66262.34	Applicable	SCAB
f. Recording keeping and reporting	Establish requirements for record keeping of manifest, test results, waste analysis , and Biennial Report	Standards for generators of hazardous waste	Title 22, CCR, Div 4.5, Ch 12, §66262.40, §66262.41	Applicable	SCAB
Management of hazardous waste at transfer, and TSD facilities	Establish requirements for a hazardous waste treatment facility to have a plan for waste analysis, develop a security system, conduct regular inspections, provide training to facility personnel, and use a quality assurance program during construction.	Standards for owners and operators of hazardous waste transfer and TSD facilities	Title 22, CCR, Div 4.5, Ch 14, Article 2	Relevant and Appropriate	<p>The requirements may be applicable if CERCLA response action constitutes treatment, storage, or disposal as defined under RCRA, or may be relevant and appropriate if the requirements address problems or situations sufficiently similar to the specific circumstances at the site that their usage will be well suited.</p> <p>This site is not a TSD facility, however, because contamination in groundwater or soil is similar in composition to listed waste, this requirement is determined to be relevant and appropriate.</p>
Management of hazardous waste at transfer, and TSD facilities	Establish requirements for a facility to plan for emergency conditions. In addition, the design and operation of the facility must be done to prevent releases. Other requirements include testing and maintenance of equipment and incorporation of communication and alarm systems and contingency plan.	Standards for owners and operators of hazardous waste transfer and TSD facilities	Title 22, CCR, Div 4.5, Ch 14, Article 3, 4	Relevant and Appropriate	SCAB

ACTION	REQUIREMENT	CRITERIA	CITATION	ARARs DETERMINATION	COMMENTS
Use and management of containers	The remedial activities may involve treatment within containers and/or storage of treatment residuals in containers. These containers must be in good condition, compatible with the waste, kept closed except to add or remove materials and be inspected weekly. The area used to store the containers must provide adequate secondary containment and be designed with runoff controls. Also, appropriate closure of the containers must take place.	Standards for owners and operators of hazardous waste facilities that store or treat hazardous waste in containers.	Title 22, CCR, Div 4.5, Ch 14, Article 9	Relevant and Appropriate	SCAB
Tank systems	The remedial activities may involve storage and/or treatment in tanks. These tanks are required to have secondary containment, be monitored and inspected, be provided with overfill and spill protection controls, and operated with adequate freeboard. Also, appropriate closure must take place.	Standards for owners and operators of hazardous waste facilities that store or treat hazardous waste in tanks.	Title 22, CCR, Div 4.5, Ch 14, Article 10	Relevant and Appropriate	SCAB
Waste piles	The waste piles should be placed upon a lined foundation or base with a leachate system, protected from precipitation and wind dispersal, designed to prevent runoff and runoff. Also, closure and post-closure care requirements.	Standards for owners and operators of hazardous waste facilities that store or treat hazardous waste in waste piles.	Title 22, CCR, Div 4.5, Ch 14, Article 12	Relevant and Appropriate	Remedial action may involve soil excavation and the compiling of soil in a temporary waste pile.
Landfills	The requirements for landfills include the design and operation, action leakage rate, monitoring and inspection, response actions, surveying and recordkeeping and closure and post-closure care.	Standards for owners and operators of facilities that dispose of hazardous waste in landfills.	Title 22, CCR, Div 4.5, Ch 14, Article 14	Relevant and Appropriate	

ACTION	REQUIREMENT	CRITERIA	CITATION	ARARs DETERMINATION	COMMENTS
Miscellaneous units	Applies to waste management unit not otherwise regulated under RCRA. It may include pumps, auxiliary equipment, air strippers, etc. The substantive requirements include design, construction, operation, maintenance and closure of the unit that will ensure protection of human health and the environment. The actions include general inspections for safety and operation efficiency, testing and maintenance of the equipment (including testing of warning systems).	Standards for owners and operators of hazardous waste facilities that store or treat hazardous waste in miscellaneous units.	Title 22, CCR, Div 4.5, Ch 14, Article 16	Relevant and Appropriate	Remedial activities may involve the use of pumps, auxiliary equipment, air strippers, etc.
Land Disposal Restrictions (LDR) for RCRA wastes and non-RCRA wastes	Movement of hazardous waste to new locations and placed in or on land will trigger LDR. General applicability, dilution prohibited, waste analysis and record keeping, and special rules apply for wastes that exhibit a characteristic waste. Best Demonstrated Available Technology (BDA) standards for each hazardous constituents in each listed waste, if residual is to be disposed. Treatment standards table when necessary.	Defines hazardous wastes that are restricted from land disposal and prohibited waste that may be land disposed	Title 22, CCR, Div 4.5, Ch 18, Article 1, 3, 4, 10, 11	Applicable	Where applicable, hazardous waste generated from remedial activities must comply with LDR and meet or notify the disposal facility of the treatment standards before disposal at an appropriate offsite disposal facility.
Closure and post-closure care	Owners and operators shall close a facility and perform post-closure care when contaminated subsurface soil cannot be practically removed or decontaminated.	Waste residues, contaminated containment system components, contaminated soil, and structures and equipment left in place at final closure triggers post-closure care requirements when clean closure is not achieved.	Title 22, CCR, Div 4.5, Ch 14, §66264.111, §66264.112, §66264.115 through 120	Relevant and Appropriate	Contaminated soil, residues, or groundwater from remedial action at a site will achieve clean closure, otherwise, post-closure care requirements will be relevant and appropriate.

ACTION	REQUIREMENT	CRITERIA	CITATION	ARARs DETERMINATION	COMMENTS
Groundwater monitoring and response	Owners or operators of a RCRA surface impoundment, waste pile, land treatment unit, or landfill shall conduct a monitoring and response program for each regulated unit.	Constituents in or derived from the units may pose a threat to human health or the environment.	Title 22, CCR, Div 4.5, Ch 14, §66264.91 (a) and (c)	Relevant and Appropriate	Substantive technical requirements are potentially relevant and appropriate for remedial action including groundwater monitoring.
Monitoring	Requirements for monitoring groundwater, surface water, and vadose zone.	RCRA hazardous waste TSD facilities	Title 22, CCR, Div 4.5, Ch 14, §66264.97 (b), (c), (d) and (e)(1) through (e)(5)	Relevant and Appropriate	SCAB
Containment and detection of releases	In order to prevent release of hazardous constituents to the environment, tank systems, including ancillary equipment, shall have secondary containment (e.g., double-wall piping).	RCRA hazardous waste TSD facilities	Title 22, CCR, Div 4.5, Ch 14, §66264.193 (b) and (c)	Relevant and Appropriate	Potentially applicable to some portion of the remedial system.
Detection monitoring	Requires the owner or operator of a regulated unit to develop a detection monitoring program that will provide reliable indication of a release.	RCRA hazardous waste TSD facilities	Title 22, CCR, Div 4.5, Ch 14, §66264.98	Relevant and Appropriate	SCAB
Evaluation monitoring	Requires the owner or operator of a regulated unit to develop an evaluation monitoring program that can be used to assess the nature and extent of a release from the unit.	RCRA hazardous waste TSD facilities	Title 22, CCR, Div 4.5, Ch 14, §66264.99	Relevant and Appropriate	SCAB
Corrective action	The owner or operator is required to take corrective action under Title 22, CCR, §66264.91 to remediate releases from the regulated unit and to ensure that the regulated unit achieves compliance with the water quality protection standard.	RCRA hazardous waste TSD facilities	Title 22, CCR, Div 4.5, Ch 14, §66264.100 (a) through (d), (f), (g)(1), and (h)	Relevant and Appropriate	SCAB

ACTION	REQUIREMENT	CRITERIA	CITATION	ARARs DETERMINATION	COMMENTS
Corrective action for Waste Management Units	The owner or operator is required to take corrective action to remediate releases from any solid or hazardous waste management unit at the facility to protect public health and the environment..	RCRA hazardous waste TSD facilities	Title 22, CCR, Div. 4.5, Ch. 14, Art. 6, §66264,101	Relevant and appropriate	Substantive technical requirements are potentially relevant and appropriate for remedial action including groundwater monitoring.
Safe Drinking Water Act (SDWA) Underground Injection Control (UIC) regulations  Toxic Injection Well Control Act of 1985	Establishes minimum requirements for UIC programs such as permits for the injection wells. Injection may not cause a violation of the primary MCLs and requires the evaluation of the quality of water.	Standards for injection of fluids into subsurface wells.	40 Code of Federal Regulations, §260.10 Parts 144 through 147  Cal. Health and Safety Code, §25159.10 through 25	Applicable	Potentially applicable for alternative utilizing a groundwater injection option to aquifers that are or may reasonable be expected to be a source of drinking water. If the treated water is most likely to be at or below the applicable primary MCLs, it is highly unlikely to be classified as either a RCRA or non-RCRA hazardous waste. Consequently, the reinjection wells would be Class V wells under SDWA UIC regulations. The substantive requirements of UIC regulations for Class V wells need to be met.

ACTION	REQUIREMENT	CRITERIA	CITATION	ARARs DETERMINATION	COMMENTS
Institutional Controls	<p>Allows DTSC to enter into an agreement with the owner of a hazardous waste facility to restrict present and future land usages.</p> <p>Provides a streamlined process to be used for entering into an agreement to restrict specific usage of property in order to implement land-use restrictions</p>	Transfer of property from a federal agency to a non-federal agency	<p>Cal. Health and Safety Code, §25202.5, 25222.1</p> <p>Cal. Civil Code, §1471</p>	Relevant and Appropriate	<p>The substantive provisions of Cal. Health and Safety Code (HSC), §25202.5 are the general narrative standards to restrict “[p]resent and future uses of all or part of the land on which the ... facility ... is located ...”</p> <p>HSC §25222.1 provides the authority for the state to enter into voluntary agreement to establish land-use covenants with the owner of the property. The substantive provision of this section is the general narrative standard “[r]estricting specified uses of the property”.</p> <p>Cal. Civil Code §1471 provides conditions under which land-use restrictions will apply to successive owners of land.</p>
Land Use Restrictions	Provides processes and criteria for obtaining written variances from a land-use restriction and for removal of the land-use restrictions.	Institutional Controls are a component of the remedy.	Cal. Health Safety Code §§ 25233(c) and 25234	Relevant and Appropriate	Cal Health & Safety Code § 25233(c) sets forth “relevant and appropriate” substantive criteria for granting variances based upon specified environmental and health criteria. Cal. Health & Safety Code § 25234 sets forth the following “relevant and appropriate” substantive criteria for the removal of a land-use restriction on the grounds that “...the waste no longer creates a significant existing or potential hazard to present or future public health or safety.”

ACTION	REQUIREMENT	CRITERIA	CITATION	ARARs DETERMINATION	COMMENTS
Land-use Covenants	Requirements for land-use covenants	Institutional Controls are a component of the remedy.	Title 22, CCR, § 67391.1	Relevant and Appropriate	Title 22, CCR, § 67391.1 provides for a land-use covenant to be executed and recorded when remedial actions are taken and hazardous substances will remain at the property at concentrations that are unsuitable for unrestricted use of the land. The substantive provisions of this regulation have been determined to be "relevant and appropriate" state ARARs by the DON.
Occupational Health and Safety Act	Specific requirements that employers must meet to ensure the safety of their employees.		Cal. Labor Code §6300 et seq.	Relevant and Appropriate	The provisions of this act should be followed for the remedial action.

7040 Trabuco Road  
Irvine, California 92618

**REGIONAL WATER QUALITY CONTROL BOARD (RWQCB) APPLICABLE OR RELEVANT AND APPROPRIATE REQUIREMENTS (ARARs) FOR IRP SITE 1 THE FORMER EXPLOSIVE ORDNANCE DISPOSAL (EOD) TRAINING RANGE, FORMER MARINE CORPS AIR STATION EL TORO, ORANGE COUNTY, CALIFORNIA**

Dear Mr. Newton:

On April 3, 2006, we received your request for ARARs for a potential response action at IRP Site 1 in compliance with Section 121 (d) (2) (A) of CERCLA and the National Contingency Plan 40 CFR Section 300.400 (g) and 300.515(d) and (h). The following is a list of our ARARs:

- **Water Quality Control Plan Santa Ana River Basin 1995 (Basin Plan)**

**Citation:** Chapter 3, Beneficial Uses

**Description:** The former Marine Corps Air Station El Toro is located over the Irvine Groundwater Management Zone. The Basin Plan defines beneficial uses for groundwater beneath former Marine Corps Air Station El Toro as municipal, agricultural, industrial service and industrial process supply.

**Comments:** The identification of the groundwater as a potential drinking water source forms a basis for selection of concentration limits, cleanup levels and treatment levels.

**ARAR Status:** Applicable, Action

**Citation:** Chapter 4, Water Quality Objectives

**Description:** Defines the groundwater quality objectives for non-degradation, taste and odor, bacteria, chemical constituents, toxic substances, radioactivity and minerals.

**Comments:** Applies to all cleanups of discharges that may affect water quality.

**ARAR Status:** Applicable, Action, Chemical

***California Environmental Protection Agency***

- **Statement of Policy with Respect to Maintaining High Quality of Waters in California**

**Citation:** State Water Resources Control Board Resolution No. 68-16

**Description:** Establishes policy on maintaining the high quality of California's surface waters and groundwater.

**Comments:** Applies to discharges of waste to waters of the State, including discharges to soil that may affect surface or groundwater. In-situ cleanup levels for contaminated soils must be set so that groundwater will not be degraded, unless degradation is consistent with the maximum benefit to the people of the State. If degradation is allowed, the discharge must meet standards for best practical treatment or control, and must result in the highest water quality possible, consistent with the maximum benefit to the people of the State. In no case may water quality objectives be exceeded.

**ARAR Status:** Applicable, Action, Chemical, Location

- **Sources of Drinking Water Policy**

**Citation:** State Water Resources Control Board Resolution No. 88-63 and Regional Board Resolution No. 89-42.

**Description:** Defines all groundwater and surface waters as existing or potential sources of drinking water, with a few specified exceptions (these exceptions are specified in Chapter 3, Beneficial Uses of the Basin Plan).

**Comments:** The identification of the groundwater beneath IRP Site 1 as potential sources of drinking water provides information to determine concentration limits, cleanup levels and treatment levels.

**ARAR Status:** Applicable, Location

- **Policies and Procedures for Investigation and Cleanup and Abatement of Discharges Under Water Code Section 13304**

**Citation:** State Water Resources Control Board Resolution No. 92-49 (as Amended April 21, 1994 and October 2, 1996).

**Description:** Requires the investigation, cleanup and abatement to extend to any location affected by a discharge or threatened discharge, and sets policies and procedures for all investigations and cleanup and abatement activities.

**Comments:** These policies and procedures are applicable to investigations and remedial activities at IRP Site 1.

**ARAR Status:** Applicable, Action, Chemical, and Location

- **Porter-Cologne Water Quality Control Act 1998**

**Citation:** California Water Code Section 13000

**Description:** Defines the legislative intent to attain the highest water quality reasonable, considering all demands being made.

**Comments:** Basis for selection of background levels as the goal for cleanup criteria.

**ARAR Status:** Applicable, Action

**Citation:** California Water Code Section 13176

**Description:** Requires that the analysis of material be performed in a State-certified laboratory.

**Comments:** Applies to all investigations and remedial actions.

**ARAR Status:** Applicable, Action

**Citation:** California Water Code Chapter 4, Article 4

**Description:** Requires the submission of information regarding waste discharges, and states that requirements shall be placed to implement water quality control plans. Technical or monitoring reports may be required for investigation of water quality. Provides for penalties for noncompliance.

**Comments:** Removal and remedial actions must comply with substantive requirements.

**ARAR Status:** Applicable, Action, Chemical, Location

**Citation:** California Water Code Chapter 5, Article 1

**Description:** Requires cleanup and abatement of conditions of pollution or nuisance or threatened pollution or nuisance.

**Comments:** Applies to all investigation and remedial actions.

**ARAR Status:** Applicable, Action

**Citation:** California Water Code, Chapter 10, Article 3

**Description:** Specifies the requirements for water wells, monitoring wells, and cathodic protection wells.

**Comments:** Applies to all well installations.

**ARAR Status:** Applicable, Action

**Citation:** California Water Code Sections 13240, 13241, 13242, 13243

***California Environmental Protection Agency***

Description: Establishes water quality objectives, including narrative and numerical standards, that protect the beneficial uses of surface waters and groundwater in the Region. Describes control measures designed to ensure compliance with State plans and policies, and provides comprehensive water quality planning. Includes implementation actions for setting soil cleanup levels for soils that threaten water quality.

Comments: Any activity, including a new discharge of contaminated soils or containment of contaminated soils, that may affect water quality, must not result in exceeding water quality objectives. Implementation plans and other policies and requirements may apply.

ARAR Status: Applicable, Action

- **Discharges of Waste to Land**

Citation: California Code of Regulations, Title 27, Sections 20200(c) and 20210

Description: Requires that designated waste be discharged to Class I or Class II waste management units.

Comments: Applies to discharges of designated waste (non-hazardous waste that could cause degradation of surface or ground water) to land for treatment, storage, or disposal.

ARAR Status: Applicable, Action

Citation: California Code of Regulations, Title 27, Section 20230

Description: Specifies that inert waste does not need to be discharged at classified units.

ARAR Status: Applicable, Action

Citation: California Code of Regulations, Title 27, Sections 20200(c), 20220

Description: Requires that non-hazardous solid waste be discharged to a classified waste management unit.

Comments: Applies to discharges of non-hazardous solid waste to land for treatment, storage or disposal.

ARAR Status: Applicable, Action

- **Storm Water Activities**

Citation: 40 CFR, Parts 9, 122, 123, 124, National Pollutant Discharge Elimination System, implemented by the General Permit for Discharges of Storm Water Associated with Construction Activity (Construction General Permit), Water Quality Order No. 99-08-DWQ,

Comments

Construction and earth-moving activities that result in disturbance of at least one acre are subject to Water Quality Order No. 99-08-DWQ and the NPDES General Permit for Storm Water Discharges Associated with Construction Activity. Such activities include, but are not limited to, clearing, grading, stockpiling and excavation of soil or other materials.

ARAR Status: Applicable, Action

If you should have any questions regarding the details of the ARARs listed in this letter, please call me at (951) 782-4494 or send e-mail to [jbroderick@waterboards.ca.gov](mailto:jbroderick@waterboards.ca.gov).

Sincerely,

  
John Broderick

# Memorandum

To: Sue Hakim  
Remedial Project Manager  
Department of Toxic Substances Control  
Office of Military Facilities  
5796 Corporate Avenue  
Cypress, CA 90630

Date: May 8, 2006

From: Regina Donohoe, Ph.D.  
Staff Toxicologist  
California Department of Fish and Game  
Office of Spill Prevention and Response  
20 Lower Ragsdale Dr., Suite 100  
Monterey, CA 93940

Subject: **Applicable or Relevant and Appropriate Requirements for Installation Restoration Program Site 1 at the Former Marine Corps Air Station (MCAS), El Toro, California (SITE: 400055)**

On April 30, 2006, the Department of Fish and Game, Office of Spill Prevention and Response (DFG-OSPR) received your April 26, 2006 memorandum requesting potential State Applicable or Relevant and Appropriate Requirements (ARARs), to-be-considered (TBC) criteria, advisories, guidance or proposed standards that may apply in the preparation of the Feasibility Study (FS) for Installation Restoration Program (IRP) Site 1, Former Marine Corps Air Station (MCAS) El Toro. We appreciate the opportunity to provide State laws and regulations to guide remediation at this site.

DFG-OSPR is providing the following analysis pursuant to Section 121(d)(2)(A) of the Comprehensive Environmental Response, Compensation, and Liability Act and under the National Contingency Plan (NCP), 40 Code of Federal Regulations sections 300.400(g) and 300.515(d) and (h).

IRP Site 1 covers approximately 73 acres and is located in the northeast portion of the former MCAS, El Toro in Orange County, California. The site, located within a tributary canyon of Borrego Canyon Wash, was utilized as an explosive ordnance disposal area from 1952 to 1999. A variety of military ordnance and explosives were detonated in trenches. Sulfur trioxide chlorosulfonic acid and petroleum fuels were burned on the site. According to EarthTech (2005), a habitat assessment was conducted at Site 1 in December 2000. Habitat at the site consists of non-native grassland, coastal sage scrub (9.7 acres), toyon-sumac chaparral (2.6 acres) and a bermed retention pond that provides seasonal wetland habitat (0.29 acres). A number of special status species have been observed at Site 1 including the Riverside fairy shrimp (federally endangered), Coastal California Gnatcatcher (federally threatened and California species of concern), Cactus Wren (California species of special concern), Southern California Rufous-crowned Sparrow (California species of special concern) and San Diego black-tailed jackrabbit (California species of special concern).

Sue Hakim  
May 8, 2006  
Page 2 of 2

The habitat assessment information in EarthTech (2005) was utilized to develop the attached site-specific list of Fish and Game Code Sections which may apply as State ARARs or TBC criteria with the date of enactment or promulgation. The specific citation and explanation for each listed ARAR and TBC are also included, in addition to applicable statutes and regulations. Additional biological surveys may be required to establish the applicability of the attached ARARs.

We would like to reiterate our interest in addressing any natural resource issues should there be a release(s) of any hazardous/deleterious materials at the MCAS El Toro that could affect the State's natural resources. The staff at DFG-OSPR appreciates the opportunity to provide our ARARs. If you have any questions or need further information, please contact me at (831) 649-7150 or by e-mail at [rdonohoe@ospr.dfg.ca.gov](mailto:rdonohoe@ospr.dfg.ca.gov).

**CALIFORNIA DEPARTMENT OF FISH AND GAME  
LOCATION AND ACTION SPECIFIC ARARs AND TBCs FOR INSTALLATION RESTORATION PROGRAM SITE 1,  
MCAS EL TORO**

LOCATION	STANDARD	SPECIFIC CITATION	ARAR/TBC EXPLANATION
Aquatic habitat/species	Action must be taken if toxic materials are placed where they can enter waters of the State. There can be no release that would have a deleterious effect on species or habitat.	Fish and Game Code section 5650 (a), (b) & (f)	This code section prohibits depositing or placing where it can pass into waters of the state any petroleum products (Section 5650(a)(1)), factory refuse (section 5650(a)(4)), sawdust, shavings, slabs or edgings (section 5650(a)(3)), and any substance deleterious to fish, plant life or bird life (section 5650(a)(6)). These are substantive, promulgated environmental protection requirements. These requirements impose strict criminal liability on violators. ( <i>People v. Chevron Chemical Company (1983) 143 Cal. App. 3d 50</i> ). This imposition of strict criminal liability imposes a standard that is more stringent than federal law. The extent to which each subdivision of section 5650 is relevant and appropriate depends on the site characterization.
Wildlife Species	Action must be taken to prohibit the taking of birds and mammals, including the taking by poison	Fish and Game Code section 3005 (Stats. 1957, c. 456, p. 1353 section 3005)	This code section prohibits the taking of birds and mammals, including taking by poison. ATake@ is defined by Fish and Game Code section 86 to include killing. APoison@ is not defined in the code. Although there is no state authority on this point, federal law recognizes that poison, such as Strychnine, may affect incidental taking. ( <i>Defenders of Wildlife v. Administrator, Environmental Protection Agency (1989) 882. F. 2d. 1295</i> ). This code section imposes a substantive, promulgated environmental protection requirement.

SUBJECT: APPLICABLE OR RELEVANT AND APPROPRIATE REQUIREMENTS  
FOR INSTALLATION RESTORATION PROGRAM SITE 1, FORMER  
MARINE CORPS AIR STATION, EL TORO

---

This memorandum is in response to your request for potential California "Applicable or Relevant and Appropriate Requirements" (ARARs) for Installation Restoration Program Site 1 at the former Marine Corps Air Station, El Toro. State law, as codified in the Health and Safety Code (Division 26, section 40000), provides to local and regional authorities the primary responsibilities for control of air pollution from sources other than emissions from motor vehicles. Air pollution control districts and air quality management districts are required to adopt and enforce rules to achieve or maintain the state and federal ambient air quality standards in all areas affected by emission sources under their jurisdiction.

Rules and regulations of the South Coast Air Quality Management District (SCAQMD) should be included in the consideration of action-specific ARARs for this site. If you have not contacted the SCAQMD, we recommend that you contact Mr. Jay Chen, Manager, Toxics Section, at (909) 396-2664. SCAQMD rules that may apply include:

*The energy challenge facing California is real. Every Californian needs to take immediate action to reduce energy consumption. For a list of simple ways you can reduce demand and cut your energy costs, see our website: <http://www.arb.ca.gov>.*

California Environmental Protection Agency

Sue Hakim

MAY 18, 2006  
Page 2

- 201 Permit to construct
- 203 Permit to operate
- 402 Nuisance
- 403 Fugitive dust
- 1166 Volatile organic compound emissions from decontamination of soil
- 1401 New source review for toxic air contaminants

In addition, the California Ambient Air Quality Standards (CAAQS, list enclosed) may apply as chemical-specific ARARs. If excavation is necessary, the CAAQS for respirable particulate matter (PM<sub>10</sub>) should be considered as a potential chemical-specific ARAR. This is to ensure that activities undertaken to remediate this site do not cause ambient air concentrations above the health protection levels of the CAAQS.

If you have questions, please call Mr. Lynn Baker of my staff at (916) 324-6997.

## Ambient Air Quality Standards

Pollutant	Averaging Time	California Standards <sup>1</sup>		Federal Standards <sup>2</sup>			
		Concentration <sup>3</sup>	Method <sup>4</sup>	Primary <sup>3,5</sup>	Secondary <sup>3,6</sup>	Method <sup>7</sup>	
Ozone (O <sub>3</sub> )	1 Hour	0.09 ppm (180 µg/m <sup>3</sup> )	Ultraviolet Photometry	—	Same as Primary Standard	Ultraviolet Photometry	
	8 Hour	0.070 ppm (137 µg/m <sup>3</sup> )*		0.08 ppm (157 µg/m <sup>3</sup> ) <sup>8</sup>			
Respirable Particulate Matter (PM <sub>10</sub> )	24 Hour	50 µg/m <sup>3</sup>	Gravimetric or Beta Attenuation	150 µg/m <sup>3</sup>	Same as Primary Standard	Inertial Separation and Gravimetric Analysis	
	Annual Arithmetic Mean	20 µg/m <sup>3</sup>		50 µg/m <sup>3</sup>			
Fine Particulate Matter (PM <sub>2.5</sub> )	24 Hour	No Separate State Standard		65 µg/m <sup>3</sup>	Same as Primary Standard	Inertial Separation and Gravimetric Analysis	
	Annual Arithmetic Mean	12 µg/m <sup>3</sup>	Gravimetric or Beta Attenuation	15 µg/m <sup>3</sup>			
Carbon Monoxide (CO)	8 Hour	9.0 ppm (10mg/m <sup>3</sup> )	Non-Dispersive Infrared Photometry (NDIR)	9 ppm (10 mg/m <sup>3</sup> )	None	Non-Dispersive Infrared Photometry (NDIR)	
	1 Hour	20 ppm (23 mg/m <sup>3</sup> )		35 ppm (40 mg/m <sup>3</sup> )			
	8 Hour (Lake Tahoe)	6 ppm (7 mg/m <sup>3</sup> )		—			
Nitrogen Dioxide (NO <sub>2</sub> )	Annual Arithmetic Mean	—	Gas Phase Chemiluminescence	0.053 ppm (100 µg/m <sup>3</sup> )	Same as Primary Standard	Gas Phase Chemiluminescence	
	1 Hour	0.25 ppm (470 µg/m <sup>3</sup> )		—			
Sulfur Dioxide (SO <sub>2</sub> )	Annual Arithmetic Mean	—	Ultraviolet Fluorescence	0.030 ppm (80 µg/m <sup>3</sup> )	—	Spectrophotometry (Pararosaniline Method)	
	24 Hour	0.04 ppm (105 µg/m <sup>3</sup> )		0.14 ppm (365 µg/m <sup>3</sup> )			
	3 Hour	—		—			0.5 ppm (1300 µg/m <sup>3</sup> )
	1 Hour	0.25 ppm (655 µg/m <sup>3</sup> )		—			—
Lead <sup>9</sup>	30 Day Average	1.5 µg/m <sup>3</sup>	Atomic Absorption	—	—	—	
	Calendar Quarter	—		1.5 µg/m <sup>3</sup>			Same as Primary Standard
Visibility Reducing Particles	8 Hour	Extinction coefficient of 0.23 per kilometer — visibility of ten miles or more (0.07 — 30 miles or more for Lake Tahoe) due to particles when relative humidity is less than 70 percent. Method: Beta Attenuation and Transmittance through Filter Tape.		<b>No Federal Standards</b>			
Sulfates	24 Hour	25 µg/m <sup>3</sup>	Ion Chromatography				
Hydrogen Sulfide	1 Hour	0.03 ppm (42 µg/m <sup>3</sup> )	Ultraviolet Fluorescence				
Vinyl Chloride <sup>9</sup>	24 Hour	0.01 ppm (26 µg/m <sup>3</sup> )	Gas Chromatography				

\*This concentration was approved by the Air Resources Board on April 28, 2005 and is expected to become effective in early 2006.

See footnotes on next page ...

1. California standards for ozone, carbon monoxide (except Lake Tahoe), sulfur dioxide (1 and 24 hour), nitrogen dioxide, suspended particulate matter—PM10, PM2.5, and visibility reducing particles, are values that are not to be exceeded. All others are not to be equaled or exceeded. California ambient air quality standards are listed in the Table of Standards in Section 70200 of Title 17 of the California Code of Regulations.
2. National standards (other than ozone, particulate matter, and those based on annual averages or annual arithmetic mean) are not to be exceeded more than once a year. The ozone standard is attained when the fourth highest eight hour concentration in a year, averaged over three years, is equal to or less than the standard. For PM10, the 24 hour standard is attained when the expected number of days per calendar year with a 24-hour average concentration above  $150 \mu\text{g}/\text{m}^3$  is equal to or less than one. For PM2.5, the 24 hour standard is attained when 98 percent of the daily concentrations, averaged over three years, are equal to or less than the standard. Contact U.S. EPA for further clarification and current federal policies.
3. Concentration expressed first in units in which it was promulgated. Equivalent units given in parentheses are based upon a reference temperature of  $25^\circ\text{C}$  and a reference pressure of 760 torr. Most measurements of air quality are to be corrected to a reference temperature of  $25^\circ\text{C}$  and a reference pressure of 760 torr; ppm in this table refers to ppm by volume, or micromoles of pollutant per mole of gas.
4. Any equivalent procedure which can be shown to the satisfaction of the ARB to give equivalent results at or near the level of the air quality standard may be used.
5. National Primary Standards: The levels of air quality necessary, with an adequate margin of safety to protect the public health.
6. National Secondary Standards: The levels of air quality necessary to protect the public welfare from any known or anticipated adverse effects of a pollutant.
7. Reference method as described by the EPA. An “equivalent method” of measurement may be used but must have a “consistent relationship to the reference method” and must be approved by the EPA.
8. New federal 8-hour ozone and fine particulate matter standards were promulgated by U.S. EPA on July 18, 1997. Contact U.S. EPA for further clarification and current federal policies.
9. The ARB has identified lead and vinyl chloride as 'toxic air contaminants' with no threshold level of exposure for adverse health effects determined. These actions allow for the implementation of control measures at levels below the ambient concentrations specified for these pollutants.

Subject: Request for Applicable or Relevant and Appropriate Requirements (ARARs) for Marine Corps Air Station (MCAS) EI Toro

This is in response to your request, dated April 26 2006, for Applicable or Relevant and Appropriate Requirements (ARARs) for the MCAS EI Toro.

As an Agreement State with the Nuclear Regulatory Commission (NRC), California licenses and monitors compliance of byproduct materials use as defined by the Atomic Energy Act of 1954. In addition, the California Department of Health Services (CDHS) controls the uses of naturally occurring radioactive materials (e.g. radium-226). CDHS regulatory authority does not include the licensing and compliance monitoring of facilities under exclusive federal jurisdiction. This is the NRC's responsibility. CDHS becomes involved when a federal facility (e.g. a military base) is going to close and revert to State control. We are currently providing radiological consultation for closing military bases in California in preparation for the bases being transferred into State, local or private ownership.

Listed below are the regulations, statutes and guidance that pertain to radioactive materials found on military bases in California.

1. Title 10, Code of Federal Regulations (CFR), Sections 20.1001-2402 and Appendices A through F, as incorporated by reference to Title 17, California Code of Regulations (CCR), Section 30253. A significant change in the regulations, as adopted by California, is that the federal term "licensee" is replaced by "user" as defined in Title 17, CCR, Section 30100.
2. Title 10, Code of Federal Regulations (CFR), Sections 20.1402, 20.1403 and 20.1404, Radiological Criteria for License Termination; Final Rule.
3. Relevant guidance documents published by the Nuclear Regulatory Commission (NRC) (e.g. NUREG/CR - 5849).

Ms. Sue Hakim  
May 23, 2006  
Page 2

If you have questions about DHS' ARARs or their applications to this base, please contact me at (916) 449-5921.

Subject: Former Marine Corp Air Station El Toro  
Sewer Discharge Requirements and Considerations

The Orange County Sanitation District (OCSD) is in receipt of your letter dated April 26, 2006, requesting input on Applicable or Relevant and Appropriate Requirements (ARARs) and any to-be-considered (TBC) criteria that may be required for the former Marine Corp Air Station (MCAS) El Toro site.

OCSD is committed to meet all the ocean discharge standards and to participate in providing resources for biosolids application and water reuse in our region. OCSD is currently involved with the Orange County Water District in a major water reuse project, "the Groundwater Replenishment System," which will be completed in 2007. To accommodate this project, OCSD is expected to deliver 85 million gallons per day of highly treated wastewater for further advanced treatment to produce potable water. To ensure success, OCSD must control all the pollutants of concern not only from an ocean discharge toxicity perspective, but also from a drinking water perspective. For example, drinking water pollutants, such as perchlorate; 1,4-dioxane; and N-Nitrosodimethylamine (NDMA), have recently emerged as pollutants of concern, and as a result, OCSD is expanding its Source Control Program to regulate these pollutants in an effort to reduce the discharge of such pollutants to the sewer system.

Although it is difficult to accurately predict all the future applicable discharge standards due to the dynamic nature of the emerging regulations, the following is OCSD's current estimate of the effluent standards and requirements for your consideration for a Feasibility Study for Installation Restoration Program Site 1 at MCAS El Toro:

- To protect the reusability of the treated wastewater, every applicant for a Special Purpose Discharge Permit (SPDP), the type of permit that would be applicable in this case, must comply with Attachment 112, *Evaluation of Alternative Discharge Methods*, a copy of which is attached, before an SPDP permit application is distributed. OCSD requires the applicant to technically evaluate and justify why no other disposal options are reasonably available. To protect the public health and potable water resources, MCAS El Toro is strongly advised to consider all other reasonable options before considering sewer discharge.
- Consideration must be given to enable MCAS El Toro to have the flexibility for accommodating the treatment of the emerging pollutants of concern that may impact OCSD's ability to meet its commitments and to ensure compliance with standards for ocean discharge, biosolids land application, and water reuse. If

Sue Hakim, Department of Toxic Substances Control  
 Page 2  
 May 23, 2006

needed, the pretreatment system should have the capability and the flexibility to meet the required standards by adding additional advanced treatment units, such as microfiltration, ion exchange, reverse osmosis, advanced oxidation utilizing ultraviolet radiation, or any other pertinent technology or disposal alternatives.

- Table 1 below indicates the current local discharge limits for dischargers to OCSD's sewers as found in OCSD's *Wastewater Discharge Regulations* (Ordinance No. OCSD-01), a copy of which is attached:

<b>Table 1 – OCSD's Local Discharge Limits</b>	
<b>Constituent</b>	<b>Limit, mg/L</b>
Arsenic	2.0
Cadmium	1.0
Chromium	2.0
Copper	3.0
Cyanide, Amenable	1.0
Cyanide, Total	5.0
Lead	2.0
Mercury	0.03
Nickel	10.0
Oil & Grease of Petroleum Origin	100.0
Polychlorinated Biphenyls	0.01
Pesticides	0.01
Silver	5.0
Sulfide, Dissolved	0.5
Sulfide, Total	5.0
Total Toxic Organics*	0.58
Zinc	10.0

\* The compounds that make up Total Toxic Organics are shown in Table 2 below. This list may be modified occasionally.

<b>Table 2 – Compounds Comprising "Total Toxic Organics"</b>		
1,1,1-trichloroethane	2-methylphenol	Methylene chloride
1,1,2-trichloroethane	4-methylphenol	Tetrachloroethylene
1,1-dichloroethane	Benzene	Toluene
1,2-dichloroethane	Chloroform	Trichloroethylene
1,2-dichloropropane	Dichlorobromomethane	
2,4,6-trichlorophenol	Ethylbenzene	

Sue Hakim, Department of Toxic Substances Control

Page 3

May 23, 2006

- In addition to the standards above, MCAS El Toro must provide treatment for the new pollutants, including perchlorate; NDMA; and 1,4-dioxane, that are currently regulated as part of the wastewater standards. Until numerical discharge limits have been developed for these pollutants, MCAS El Toro must provide treatment for these pollutants so that the discharge alone, or collectively, will not negatively impact OCSD's capability to meet its environmental and regulatory obligations. For more information, please refer to the attached Table 3.
- If a Special Discharge Permit (SPDP) is issued for discharge to the sewer, there are costs associated with the permit and its related requirements. Refer to the attached Ordinance No. OCSD-26 for an example of the current fees. Please note that it is anticipated that a new fee ordinance will become effective soon. Check OCSD's website ([www.ocsd.com](http://www.ocsd.com)) for the latest information.
- Please note that in the past, a superfund site was considered an industrial source, the discharge of which was not approved to be used for water reclamation. Please contact the California Department of Health Services to obtain a better understanding whether your effluent would be considered an industrial source that would not be acceptable for water reclamation.

OCSD hopes that you find this information useful. Please note that Don McIntyre is no longer OCSD's General Manager. Currently, James D. Ruth is the Interim General Manager.

If you have any questions, please contact me at (714) 593-7410 or Mark Kawamoto at (714) 593-7424.

Mahin Talebi  
Source Control Manager

**ATTACHMENT**

<b>Table 3 – Emerging Pollutants of Concern</b>	
<b>Constituent</b>	<b>Suggested Discharge Limit</b>
1,4-dioxane	Drinking water action level of 3 parts per billion (ppb). Dischargers with high levels have been asked to eliminate or reduce the discharge of this compound to the sewer. Although there is no wastewater discharge limit at this time, we are asking potential dischargers to discharge at the background level (2 to 5 ppb) to limit their liabilities.
N-Nitrosodimethylamine (NDMA)	Drinking water action level of 10 parts per trillion. OCSD has requested dischargers to switch to products that do not contain NDMA or its precursors. Although there is no wastewater discharge limit at this time, we are asking potential dischargers to discharge at the background level (100 to 500 parts per trillion) to limit their liabilities.
Perchlorate*	Drinking water action level of 4 parts per billion (ppb). Although there is no wastewater discharge limit at this time, we are asking potential dischargers to discharge at a level to keep the concentration of OCSD's influent and effluent at the background level of 4 ppb to protect the marine life and water resources.

\* There is concern among OCSD's staff that perchlorate may cause bioaccumulation in aquatic organisms. Until definitive studies are reviewed, it has been suggested that OCSD limit perchlorate discharges to 4 to 6 ppb.

# ORANGE COUNTY SANITATION DISTRICT SPECIAL PURPOSE DISCHARGE PERMIT ATTACHMENT 112

## EVALUATION OF ALTERNATIVE DISCHARGE METHODS

According to the District's Wastewater Discharge Regulations (Ordinance), Article 2, Section 203, "No person shall discharge groundwater, surface runoff, or subsurface drainage directly or indirectly to the District's sewerage facilities except as provided herein."

This prohibition may only be diverged from if the District grants approval of the discharge through a Special Purpose Discharge Permit. Pursuant to Section 305, et seq., the District may approve discharge of such water only "when no alternate method of disposal is reasonably available, or to mitigate an environmental risk or health hazard."

A Special Purpose Discharge Permit applicant must demonstrate that alternative methods of disposal, such as discharge to the storm drain, recycle and reuse, groundwater recharge, wastehauling, etc., are either not available, or are economically and/or technically not feasible. The following elements must be considered and included in the alternative disposal evaluation.

### Alternative Disposal Evaluation Report

You are required to develop and submit a detailed technical, and cost, analysis for each alternative. In determining whether to approve discharge to the sewer, the District will consider several factors. Convenience or cost alone will not be considered sufficient to demonstrate that disposal to the sewer is the only reasonable alternative. Consider and evaluate, at a minimum, the following alternatives:

1. Recycling the water to an industrial process
2. Re-injection in the aquifer
3. Discharge to storm drain
4. Trucking to a Class I disposal site.

For each of the above alternatives, you are required to consider the following factors, at a minimum, in the evaluation and comparison:

1. Technical feasibility
2. Cost
3. Feasibility conveyance of water and cost
4. Environmental impact of the alternative discharge method
5. Other extenuating circumstances that impact feasibility of alternative.

### Documentation

You are required to submit with your evaluation support documentation that factors into an approval to discharge to the sewer. Such documentation shall include, but not be limited to:

- Written communication from the Regional Water Quality Control Board or any other regulatory agency that has jurisdiction over the site and discharge that specifically limits or prohibits discharge to the storm drain from the subject site.
- Written decision or disposition from the local authorities regarding the conveyance of the water to the storm drain or other disposal site, such as right of way, interruption of traffic, extensive construction, etc.
- Any written document that prohibits discharge due to environmental impact or other cause.

Approval will not be considered without such documentation, as appropriate.

# South Coast Air Quality Management District

21865 Copley Drive, Diamond Bar, CA 91765-4178

Department of Toxic Substances Control  
Office of Military Facilities  
5796 Corporate Avenue  
Cypress, CA 90630

Attn: Ms. Sue Hakim  
Remedial Project Manager

The AQMD appreciates your request for input into compiling Applicable or Relevant and Appropriate Requirements (ARAR) for Installation Restoration Program, Site 1 (IRP Site 1), the former Explosive Ordnance, at the former Marine Corps Air Station (MCAS), El Toro, California.

The following AQMD Rules and Regulations, which are available at our website, [www.aqmd.gov](http://www.aqmd.gov), should be incorporated in the ARAR.

## Regulation IV - Prohibitions

### *Rule 401 - Visible Emissions*

This rule limits any visible emissions from any single source to less than Ringlemann No. 1 or 20 percent opacity for 3 minutes in any hour (Ref. Health and Safety Code 41701).

### *Rule 402 - Nuisance*

This rule prohibits the discharge of any air contaminant or other material (including odorous compounds) that causes injury or annoyance to the public, endangers the comfort, repose, health or safety of the public, or causes damage to business or property. In general, a Notice of Violation may be issued upon receipt of six verified complaints, or for any property damage, or personal injury (Ref. Health and Safety Code 41700).

### *Rule 403 - Fugitive Dust*

This rule limits on-site activities so that the concentrations of fugitive dust at the property line shall not be visible. In addition, PM<sub>10</sub> levels shall not exceed 50 micrograms per cubic meter as determined by the difference between upwind and downwind samples collected on high volume particulate matter samplers. These requirements do not apply if the wind gusts exceed 25 miles per hour. The rule also requires every reasonable precaution to minimize fugitive dust and the prevention and cleanup of any material accidentally deposited on paved streets. This rule shall not apply during life-threatening situations, or during a declared disaster, or state of emergency.

DTSC

-2-

May 30, 2006

***Rule 404 - Particulate Matter***

This rule limits equipment from discharging particulate emissions in excess of 0.01 to 0.196 grain per cubic foot based on a given volumetric (dry standard cubic feet per minute) exhaust gas flow rate averaged over one hour or one cycle of operation. It excludes steam generators or gas turbines.

***Rule 405 - Solid Particulate Matter***

This rule limits equipment from discharging particulate emissions in excess of 0.99 to 30 pounds per hour based on a given process weight.

***Rule 407 - Liquid and Gaseous Air Contaminants***

This rule limits equipment from discharging carbon monoxide emissions in excess of 2000 ppm and sulfur dioxide emissions of 500 ppm or greater averaged over 15 minutes. It excludes stationary internal combustion engines, propulsion of mobile equipment or emergency venting.

***Rule 408 - Circumvention***

This rule prohibits a person from building, erecting, installing or using any equipment, the use of which reduces or conceals an emission which would otherwise constitute a violation of these rules or Chapter 3 (starting with 41700) of Part 4, of Division 26 of the Health and Safety Code.

***Rule 409 - Fuel Combustion Contaminants***

This rule limits the emissions of particulate matter from the exhaust of a combustion source (such as a gas turbine) to 0.23 grams per cubic meter (0.1 grains per standard cubic foot) at 12 percent CO<sub>2</sub> averaged over 15 minutes. It excludes internal combustion engines.

***Rules 431.1, 431.2, 431.3 - Sulfur Content of Gaseous, Liquid or Fossil Fuels***

These rules limit sulfur compounds from combustion of gaseous fuels, other than natural gas, not to exceed 40 ppm, 0.05 percent by weight for liquid fuels (15 ppmw for fuels purchased after 6/1/04) and 0.56 pounds of sulfur per million BTU for solid fossil fuels.

***Rule 474 - Fuel Burning Equipment-Oxides of Nitrogen***

This rule limits the concentration of oxides of nitrogen (as NO<sub>2</sub>) averaged over 15 minutes, from any non-mobile fuel burning equipment, to a range of 125 to 300 ppm for gaseous fuels and 225 to 400 ppm for solid and liquid fuels depending on equipment size.

**Regulation X - National Emission Standards for Hazardous Air Pollutants**

This regulation implements the provisions of Part 61, Chapter I, Title 40 of the Code of Federal Regulations (CFR) under the supervision of the AQMD Executive Officer. It specifies emissions testing, monitoring procedures or handling of hazardous pollutants such as beryllium, benzene, mercury, vinyl chloride and asbestos.

DTSC

-3-

May 30, 2006

### Regulation XI - Source Specific Standards

#### *Rule 1150 - Excavation of Landfill Sites*

This rule states that no person shall initiate excavation of an active or inactive landfill without an Excavation Management Plan approved by the Executive Officer of AQMD. The Plan shall provide information regarding the quantity and characteristics of the material to be excavated and transported and shall identify mitigation measures including gas collection and disposal, baling, encapsulating, covering the material and chemical neutralizing.

#### *Rule 1166 - Volatile Organic Compound Emissions from Decontamination of Soil*

This rule limits the emissions of volatile organic compounds (VOCs) from contaminated soil to less than 50 ppm. For contaminated soil with 50 ppm or greater, an approved mitigation plan, describing removal methods and mitigation measures, must be obtained from the District prior to proceeding with the excavation. Uncontrolled spreading of contaminated soil is not permitted.

### Regulation XIII - New Source Review

This regulation applies to any new or modified equipment, which may cause the issuance of any non-attainment air contaminant, ozone depleting compound or ammonia. It requires all equipment to be constructed with BACT (Best Available Control Technology). For non-attainment emission increases, it requires the emission increases to be offset and substantiated with modeling that the equipment will not cause a significant increase in concentrations of non-attainment contaminants.

### Regulation XIV - Toxics

#### *Rule 1401 - New Source Review of Carcinogenic Air Contaminants*

This rule specifies limits for cancer risk and excess cancer cases from new stationary sources and modifications to existing stationary sources that emit carcinogenic air contaminants. The rule establishes allowable emission impacts for all such stationary sources requiring new permits pursuant to AQMD Rules 201 or 203. Best Available Control Technology for Toxics (T-BACT) will be required for any system where a lifetime (70 years) maximum individual cancer risk of one in one million or greater is estimated to occur. Limits are calculated using risk factors for specific contaminants.

#### *Rule 1470 - Requirements for Stationary Diesel Fueled Internal Combustion and Other Compression Ignition Engines*

This rule applies to any person who sells, offers for sale, leases or purchases for use in the South Coast AQMD any stationary compression ignition engine with a rated brake horsepower greater than 50. Portable engines are subject to this Rule if they remain at the same facility location for more than 12 consecutive rolling months or 365 rolling days, not including time spent in a storage facility. This Rule specifies the use of CARB low diesel fuel or alternative fuels, limits on non-emergency operators or diesel PM standards (including emission control technology) in order to reduce the emissions impact including cancer risk on affected receptors located near the engine exhaust.

Best Available Control Technology (BACT) Guidelines Document

This document was compiled by AQMD. Although a guideline, it set up BACT requirements for various types of equipment or process. BACT is determined on a permit-by-permit basis based on the definition of BACT. In essence, BACT is the most stringent emission limit or control technology that is:

- found in a state implementation plan (SIP), or
- achieved in practice, or
- is technologically feasible and cost effective.

For practical purposes, at this time, nearly all AQMD BACT determinations will be based on achieved-in-practice BACT because it is generally more stringent than BACT based on SIP, and state law constrains AQMD from using the third approach.

If you have any questions regarding these regulations, please call Mr. Ted Kowalczyk at (909) 396-2592.

Very truly yours,

Jay Chen  
Senior Manager  
Toxics and Waste Management Unit

**Document Title:**

Draft Action Memorandum, Time-Critical Removal Action, Installation Restoration Program Site 1, Adjacent Property, Former Marine Corps Air Station El Toro, California. November 2009.

Reviewer: Quang Than, Remedial Project Manager, California Department of Toxic Substances Control, Brownfields and Environmental Restoration Program. Letter dated December 24, 2009.

Comment No.	Section/ Page No.	Comment	Response
<b>SPECIFIC COMMENTS</b>			
1.	Section 2.1.3	Section 2.1.3 states that the property west of Agua Chinon Wash, which is part of the AP, is zoned for medium-density residential housing. Sections 4.1.2, 4.1.3, and 8 state that following implementation of the TCRA, the entire AP would be released for unrestricted use, and land use/institutional controls and access restrictions would not be required. DTSC will review the Work Plan for this TCRA, and the results and findings from the TCRA, to ensure that the munitions characterization and removal procedures are adequate to enable the Navy to thoroughly indentify and remove all MEC and MD items thus render the AP safe for unrestricted use.	Comment noted.
2.	Section 2.1.1.3	Section 2.1.1.3 states that 25 MEC and MD items were collected from the AP in the 2008 munitions characterization activities. Section 2.1.4 states that 25 MEC items were collected from the AP. Figure A-3 indicates that about 19 MEC items and 32 MD items were indentified and recovered from the AP. Please explain or reconcile the discrepancies.	Section 2.1.1.3 will be revised to state:  "This investigation identified 25 MEC items from 21 locations as well as additional MD items on the Adjacent Property up to 1,100 feet from the IRP Site 1 fence line."  Figure A-3 correctly shows 21 MEC locations.
3.	Section 4.1.4.2	The second paragraph of Section 4.1.4.2 needs updating to reflect the electronic mail from DTSC on November 30, 2009 forwarding the latest list of ARARs prepared by the California Department of Fish and Game.	Text will be updated as suggested. The Fish and Game Code regulations accepted by the Navy as ARARs for the removal action will be added to the ARARs list in Appendix B.

*Reviewer: Quang Than, Remedial Project Manager, California Department of Toxic Substances Control, Brownfields and Environmental Restoration Program. Letter dated December 24, 2009.*

Comment No.	Section/ Page No.	Comment	Response
4.	Figure A-4	Please identify the Agua Chinon Retarding Basin in Figure A-4.	The label for Agua Chinon Wash will be revised to indicate "Agua Chinon Retarding Basin" on Figure A-4.
5.	Section 1	Please correct the typographical errors in the last two paragraphs of Section 1.	The typographical errors will be corrected.

EPA Comments on Draft Time-Critical Removal Action Work Plan, IRP Site 1, Adjacent Property, Former Marine Corps Air Station, El Toro

**COMMENTS ON DRAFT ACTION MEMORANDUM, TIME-CRITICAL REMOVAL  
ACTION, INSTALLATION RESTORATION PROGRAM SITE 1 ADJACENT  
PROPERTY, FORMER MARINE CORPS AIR STATION, EL TORO  
GeoTracker No.: DOD100136000**

Dear Mr. Callian:

We have reviewed the above-referenced document, dated November 30, 2009, which we received on December 1, 2009.

This memorandum presents the decision to undertake a removal action for potential explosive safety hazards of concern on property adjacent to the west of Installation Restoration Program Site 1. The potential munitions and explosives of concern located on the adjacent property are a result of historical past explosive ordnance disposal training activities that were conducted within Site 1.

We have no comment on this draft action memorandum.

For any questions, please call me at (951) 782-4494, or send email to [jbroderick@waterboards.ca.gov](mailto:jbroderick@waterboards.ca.gov).

Sincerely,

  
John Broderick
