1. WELCOME AND INTRODUCTIONS

2. REVIEW MINUTES FROM OCTOBER 8, 2014 RAB / REVIEW ACTION ITEMS

1. Send USACE letter on ordnance prioritization ranking to Justin – Complete, included in October 2014 Draft RAB Meeting Minutes.
2. Include link or directions to locate draft meeting minutes from previous RAB meeting in upcoming RAB meeting materials – Complete, see below:
Adak Update Website
Lower center of the opening page “What’s New”
Or
Go to “Public Involvement” the second to the left menu choice along the top of the page
The opening page says “Upcoming RAB Meeting”
Right below that is “April 2015 Meeting Package” and April 2015 Meeting Agenda”
At the bottom center, under “What’s New” is the Draft Meeting Minutes from the previous meeting.

Adak Status Website
Automatic redirects to:
http://www.bracpmo.navy.mil/brac_bases/other_west/former_naf_adak.html
Right side of opening page under the photographs “Community Information”
Or
Go to “RAB Meetings” at top of the menu on the left side of page
Page is set up with a description of the RAB, contact info for Co-Chairs, then the last draft meeting minutes and 5 years of final meeting minutes.
3. Add most recent EOD seawall sweep counts to monthly summary table – Complete, included in October 2014 Draft RAB Meeting Minutes.
4. Revise the 2015 field staff total to 50-55 in the October RAB meeting minutes – Complete, see Draft Meeting Minutes
5. Send Tracy Woo of TAC contact information for the NAVFAC NW Small Business Liaison – Complete, e-mail exchange of October 15, 2014
6. Identify the Fuel Dock Coordinator to determine if there are any remaining boxes of Adak Maps – Complete on October 9, 2014. Was told there are not.

7. Investigate the possible installation of a larger sign near the Metals Landfill – Complete. A larger sign will be installed. Discussion on-going regarding exact placement location. Originally discussed for near former wastewater treatment plant. May be more visible closer to housing.

3. MUNITIONS UPDATE

Operable Unit B-2

2013 and 2014 Summary

The first two years of the Operable Unit B-2 (OU B-2) Non-Time Critical Removal Action (NTCRA) have been completed. The NTCRA is planned to be performed in 5 Remedial Action Areas (RAAs) in Parcel 4, Operable Unit B-2. All remediation is complete in RAA-02 (located on the flank of Mt Moffett above the seawall), and in RAA-04 (located on the east side of Andrew Lake above the Rec Center). All remediation but 7 acres is complete in RAA-03 in Moffett Valley. The table below summarizes the recoveries during each of the field seasons. Recoveries by RAA are shown on the attached graphics.

Activity Description	Basis	2013	2014	Total
Intrusive Investigations	Targets	57,142	34,981	92,123
Boulder Fields Investigation	Acres	0	21.5	21.5
Seawall Sweeps	Events	6	4	10
MEC/MDEH/MPPEH Removed	Items	1,753	883	2,636
MDAS Removed	Pounds	24,496	12,961	34,457
Metal Debris Removed	Pounds	79,477	4,680	84,157

Notes:

MEC = Munitions and Explosives of Concern

MDEH = Material Documented as an Explosive Hazard

MPPEH = Material Potentially Presenting an Explosive Hazard

MDAS = Material Documented as Safe

Of the 2,636 MEC/MDEH/MPPEH items removed, 43 were from the seawall sweeps.

2015 Planned Work

The 2015 is just starting, with the production work to be performed by TetraTech. The QA work will be performed by Battelle, as in previous years.

The emphasis of the work will be to complete the last 7 acres in RAA-03, and to complete the majority of the acreage in RAA-01 (the former OB/OD area in the center of Moffett Valley), and the majority of the acreage in RAA-05 (the disposal area along the Andrew Lake Seawall). The 2015 work will focus on areas that are amenable to digital geophysical

mapping (DGM) with the landfill areas and debris pits slated for a following season. The graphics on the next page show the work areas.

The Navy anticipates approximately 50 personnel on-island. The field season is anticipated to run from April 2 to September 30.

The EOD Mobile Unit 11 (Det NW Whidbey Island) is planning on two visits during 2015. The first is scheduled for April to open the seawall spillway and retrieve Cartridge Activated Devices (CADs) from Finger Bay, and the second is scheduled for September to open the seawall spillway and perform a sweep of the seawall.

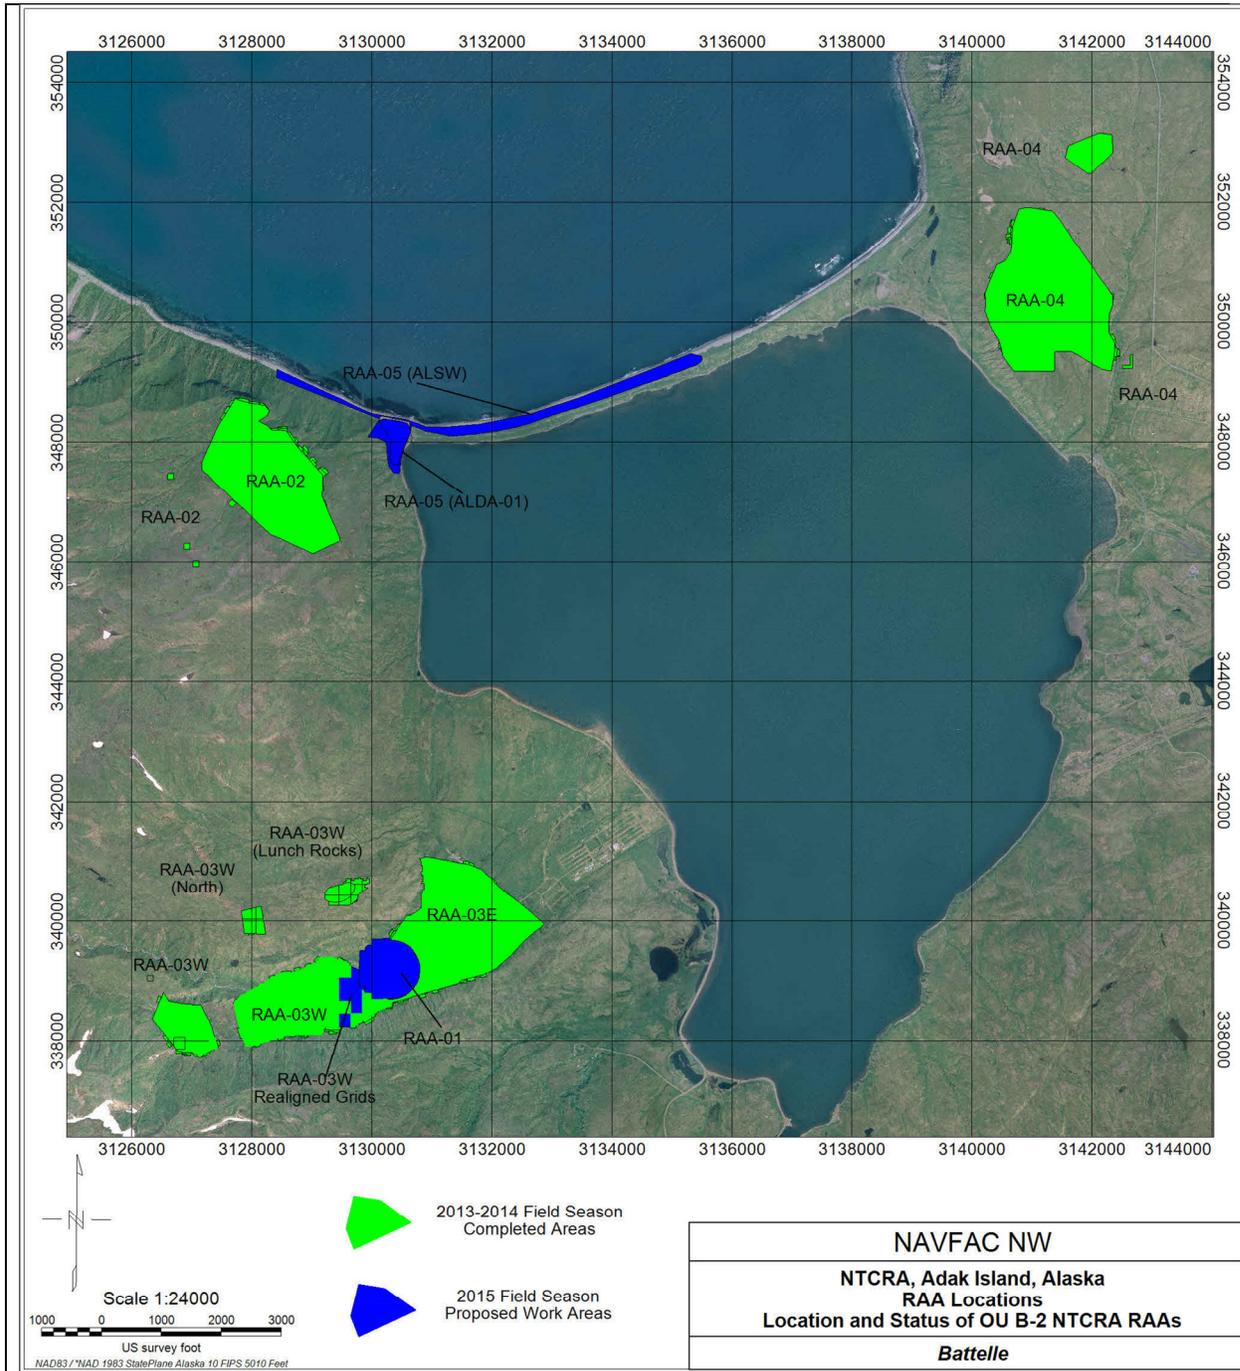

Future Work

The Navy is soliciting bids for the 2016 field season for munitions work. The specific areas to be investigated would be the metallically saturated dump areas in RAA-01 and RAA-05. If an award is made for this work, the award would be sometime during the fall of 2015.

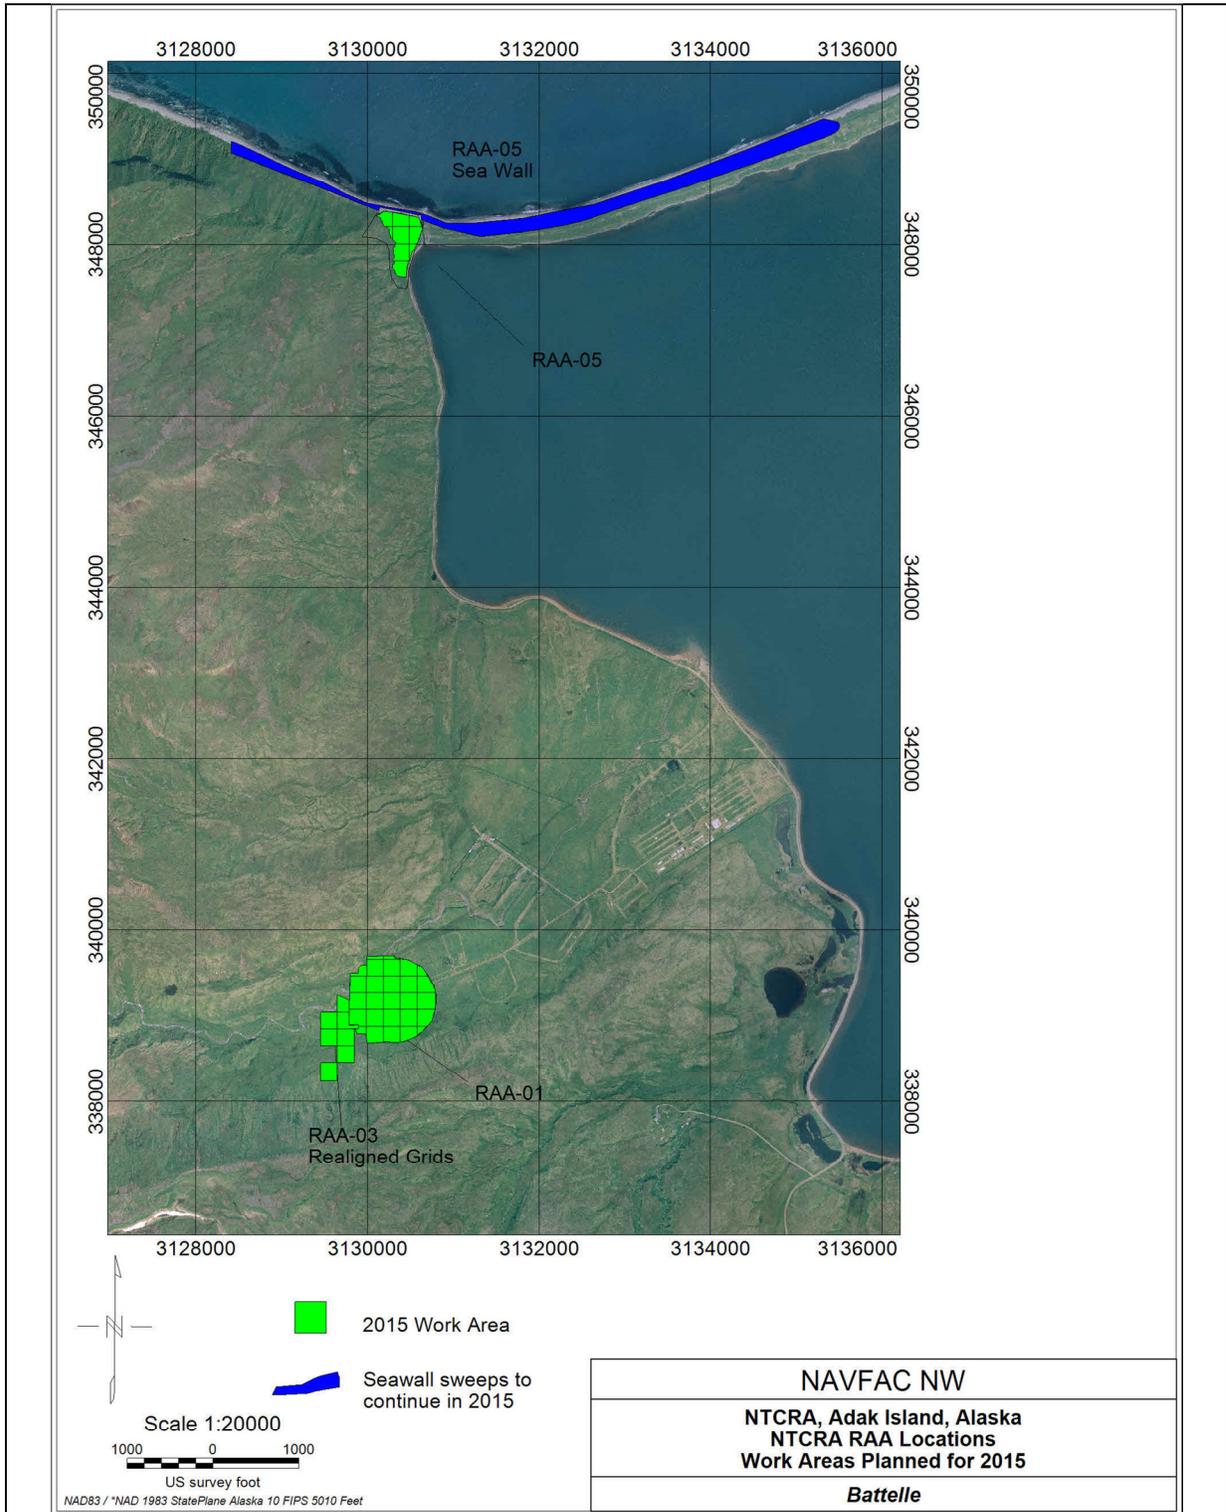

Munitions Recoveries

No munitions were reported since the last RAB meeting.

4. PETROLEUM SITES UPDATE

Free-Product Recovery

This project involves removing free-product from wells and sumps at the SWMU 62 and Area 303 sites including boom placement and maintenance at surface water body locations near the sites.

The Free-Product Annual Report for the period from October 2013 to September 2014 has been finalized and posted to the Adak Update and Adak Status websites. It is also available at City Hall. 24 gallons of petroleum were bailed from the wells during this period.

The boom monitoring and well bailing is contracted to continue monthly.

5. ANNUAL LONG TERM MONITORING UPDATE

Groundwater Monitoring

This is an on-going, annual project. The 2014 groundwater sampling occurred in August and September 2014. The report for the 2014 season is under review. Most sites show generally consistent levels of contaminants. Preliminary review of the data for several sites shows a decreasing trend such that the Navy anticipates developing a request to ADEC and EPA to reduce sampling requirements at those locations. The Navy anticipates being able to summarize the approach for these sites at the next RAB meeting.

The 2015 sampling is scheduled for the same period this year.

Marine Monitoring

This program is on an every other (odd) year schedule. Sampling last occurred in June 2013 and is planned to occur again this June.

The final technical memorandum and health advisory fact sheet for the 2013 event is available for review at the Adak City Hall office, through the Adak Update website or contact me if you wish to receive a copy of either of the documents. Currently, the fish/shellfish advisory for Sweeper Cove and Kuluk Bay remains in place. The tech memo will be updated as appropriate after the next sampling event.

6. INSTITUTIONAL CONTROLS UPDATE

Institutional Controls (IC) / Landfill Inspections and Repairs

An institutional control inspection was completed as part of the annual monitoring program in September 2014. Based on the most recent version of the Comprehensive Monitoring Plan (CMP), Revision 6, 2014 included inspections of the 5-year review sites, the four regulated landfills, and the 5 year inspections of the OU B-1 sites. No major deficiencies were noted and there were no major issues requiring immediate responses. The report for the 2014 inspections has been finalized and is available on the Adak Update and Adak Status websites and at the repository at City Hall.

There were no Institutional Controls / Landfill Repairs performed since the last RAB meeting.

Maintenance and repair activities similar in scope to those performed during 2010 are planned for this summer. While mobilization is currently underway for this work and gravel production will occur in April, the actual field activities associated with this work are scheduled to occur from mid-May to early-July. This work includes repairs at a total of 11 sites across the island including all of the Navy's former landfills. The work includes several thousand feet of fencing repair and replacement, gate repair, sign repair and replacement, landfill cap and swale repairs, armor wall repairs, erosion control, and repair of sinkholes, as well as site restoration.

Excavation Permits

Two new excavation notifications were received since the last RAB meeting. A summary of the requests is shown below:

- Adak Eagle Enterprises, LLC – Submitted a request to extend an excavation request on February 10, 2015 for the construction of a metal warehouse building at the intersection of Main and Aerology Roads.
- TetraTech EC, Inc. – Submitted an excavation request on March 17, 2015 for the OU B-2 Non-Time Critical Removal Action work in RAA-01, RAA-03W, and RAA-05.

IC Education / Awareness Activities

The Navy continues to solicit feedback quarterly from 8 on-island business and local government representatives on IC needs. IC materials are mailed out as requested. In the past year, the following IC Education / Awareness items have been requested and shipped to the island for distribution:

- 690 Adak Island Maps
- 121 Travel Mugs
- 43 Munitions Awareness Coloring Books
- 60 Bookmarks
- 50 Ordnance Awareness Magnets
- 10 Munitions Awareness Posters
- 5 Adult Munitions Awareness DVDs
- 10 Children's Munitions Awareness DVDs
- 10 Children's Munitions Awareness Posters
- 22 Small Foam Footballs

The current request for materials goes to:

- Cal Kashevarof - Adak Marine Services
- Esther Bennett - RAB Co-Chair
- Helene Sparks - Adak Real Estate
- Layton Lockett - City Manager
- Lisa Spitler - USFWS
- Merry Maxwell - USFWS
- Molly Lashier - Adak Schools
- Julie Plummer - Adak Schools

If anyone no longer wishes to receive the request or a Point of Contact should be changed, or would like to be added, please let the Navy know.

Consistent with the request for input sent out on January 16, 2015, a new version of the Adak Island Map is currently being printed and should be available shortly.

7. COMMUNITY REPORT

8. NEW WEBSITE

The Navy decided to consolidate all of their websites into a consistent format and single server.

As such, the site we've been using for the last several years - www.adakupdate.com – is no longer maintained effective April 1. The site will stay up for at least the next 6 months, so the information there is still available, but there has also been a redirect added in a red banner at the top of the Adak Update website to a new website – www.adakstatus.com .

Either site can be used to get to the www.adakstatus.com location. In the future, we may be closing the www.adakupdate.com site and placing an automatic redirect to the new site.

Anyone who was a subscriber to the Adak Update website has been migrated to the Adak Status website. If for any reason, you got the Final Agenda from the Adak Update website, but not from the Adak Status website, please go to the Adak Status website and subscribe there.

We've tried to streamline the data presented on www.adakstatus.com, have added more and current photographs, improved the process to submit dig requests, limited the environmental reports to the last 5 years, and made some other changes. If you have additional photos you would like placed in the gallery or have other suggestions for www.adakstatus.com, please let the Navy know. We were not able to carry over the active weather picture, but we do have a link in the same place for a current weather report.

10. NEXT RAB MEETING

General Sequence for RAB and Materials

-6 weeks prior - Draft Agenda sent to RAB members via e-mail

-2 weeks prior - Final Agenda, Presentation Package, and Previous RAB Minutes sent to RAB members via regular mail and posted to website. The information is also sent to non-RAB members who have requested hard copies.

-2 weeks prior - Broadcast message to www.adakstatus.com subscribers that includes the Final Agenda and a notice that the presentation package and previous RAB minutes are available on the website.

Discussion of Moving RAB to an Annual Meeting

Open discussion from RAB members on moving the meeting from semi-annual to annual. If it moves to annual, would the RAB prefer spring or fall?

Preliminary Agenda for Next RAB Meeting

Consistent with last agenda, to provide a summary of work accomplished and planned. Any items specifically need more detail?

Set Date for Next RAB

October 14, 2015

April 13, 2016

Other date
